## Business Items

Self-Lubricating linear guide.

## Illustration of Main Products

- I Built-in long life lubrication (patent).
- II Equal-loading capacity in four directions.
- III Smooth running due to new ball re-circulation (patent).
- IV High rigidity 4-row angular contact.
- V International standard dimension.
- VI High accuracy/ Low friction/ Low maintenance.
- VII High speed/ low noise.
- VIII Integral all-round sealing.
- IX Interchangeability.
- X Environment-friendly product.

## Business Items

- I Insert Molding/Two color Double Injection Molding/Over Molding
- II Lens For Rear View Camera and Rear-vision system
- III LED Lamp
- IV CCFL Wire Assembly
- V Related parts for CCFL Assembly
- VI Related wire or cable Assembly
- VII Surface Mount Technology for FPC
- VIII Rubber Sheet

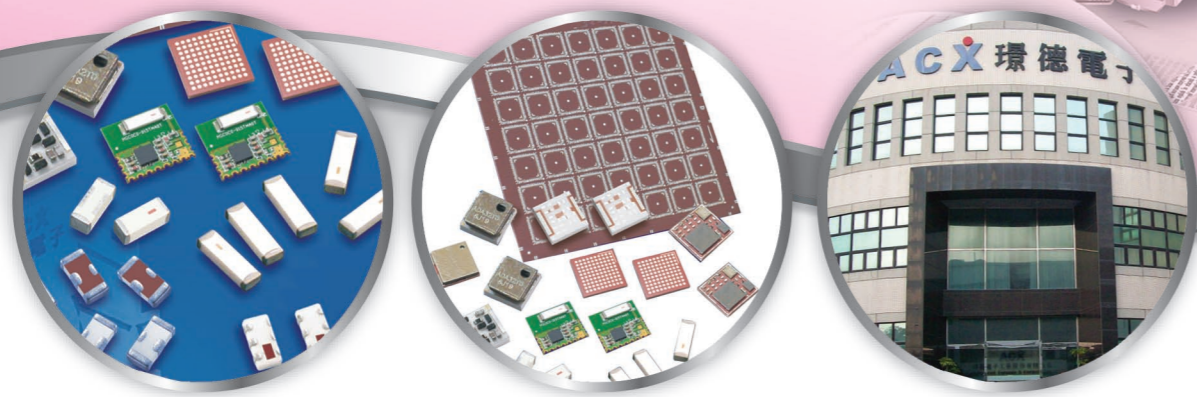

## Illustration of Main Products

- I Insert molding/The double Injecting/Over molding is applied to the Handheld Portable Housings like Cellular Phone or PDA Case, Various Key Cap or Key Button, Logo, Various Medical or Industrial Parts, Sports or Leisure, Hinge Cover and Hand Tool.
- II The product is applied to the CCM of rear view camera and rear-vision system.
- III The product is mainly applied to the Backlight Panel, Scanner, Advertisement Light Box and Car Meter Panel etc.
- IV The Surface Mount Technology For FPC is mainly applied to the Backlight Panel, Mobile Phone and Notebook PC.
- V The Rubber Sheet is applied to the light shading and shock resistant in optical electronics industry, also can be used as heat resistant in the luxury automobile.

### Business Items

High Frequency Ceramic Solutions

### Illustration of Main Products

Design and Manufacturing of High Frequency Integrated Devices and Modules

- I RF SiP Modules
- II RF Module (Front-end Modules, Bluetooth Modules, Chip Antenna Modules)
- III RF Integrated Devices (Filters, Baluns, Diplexers, Couplers)

In Taiwan, ACX is the largest producer of RF integrated ceramic devices and modules for applications in the wireless communication systems including mobile phones, Bluetooth, WLAN, WiMAX, UWB and GPS. We are offering integrated ceramic devices including filters, baluns, diplexers, couplers and antennas, and RF system-in-package (SiP) modules, e.g., BT modules, antenna switch modules (ASM) and front-end modules (FEM). With core competences of excellent RF circuit and materials design, and outstanding processing and testing capabilities, ACX has grown rapidly to be one of preferred suppliers of wireless ceramic devices and modules globally.

### Business Items

Thermal device, LED Luminaires

### Illustration of Main Products

100W LED Luminaire is one of ATD's the high-brightness LED products. The innovated character is LOOP HEAT PIPE (LHP) as the core of technology of thermal module in the LED Luminaire. LHP has developed a globally patented and already passed high standards testing through NASA that has light weight, flexible structure, long distance of transportation, no fan and no external power consumption that can be used in the high-power LED luminaire efficiently and to replace traditional heavy heat sink. The reliability of LHP was approved by the customers of Japan and Europe. The light decay rate of the product is less than 3% after 3,000 hours without the normalization time (1000 hours). In addition, the high-uniformity ratio of optical design and high stability of products was passed by the international safety certifications of UL, CE, CQC and CNS.

### Rewarded

2009 The 16<sup>th</sup> Taiwan SMEs Innovation Award

## Aiweb Technology Ltd.

### Company Profile

Owner : Hong-Wei, Chen

### Business Items

Data mining, Natural language processing, Search engine techniques, Network techniques and Internet advertising

### Illustration of Main Products

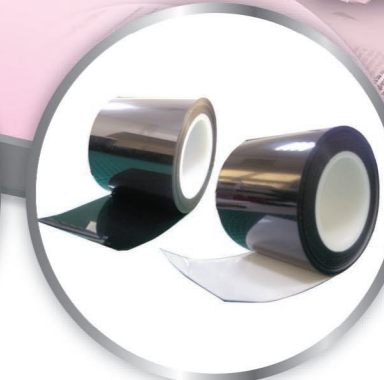

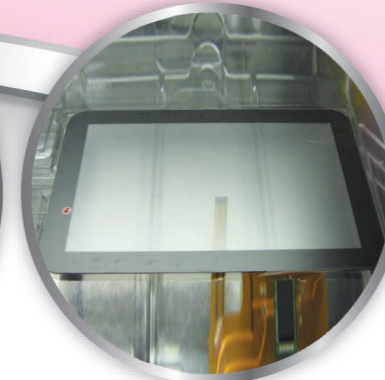

Our system can get titles and contents clearly from several articles and use data mining and semantic analysis techniques especially for Chinese to reach the following goals:

- I AITopping internet advertising  
Integration of involved network platforms and blogs( CHT Xuite blog, Yam sky blog and Sina blog) accompanying with our data mining and semantic analysis techniques, it recommends customers' with blogs actively.
- II Semantic analysis  
System can get related articles and recommend to customers by techniques of semantic analysis. Using these techniques, system can also perform articles' automatic classification and tagging.

### Business Items

Ceramic Bearing System; Components For OEM/ODM; Semiconductor application; Lighting Application; Customized parts- Ceramic Knife; Biomedical Products; Others

### Illustration of Main Products

Importing technology pioneered ceramic manufacturing process "life ceramic products" using precision ceramic injection molding technology to replace the traditional methods, and to overcome many of the original products on the limitations and defects, effectively reduce costs, maximize productivity, but also contributed to profit margins flexibility.

We combined the process as follow:

- I ceramic materials.
- II Injection Molding Technology.
- III Ultra-precision grinding processing.
- IV The patent application of the product structure and process.

## Business Items

Sandwich Structure Manufacture, The Light Weight Structure of Transportation Manufacture

## Illustration of Main Products

The main purpose of this invention is to provide less weight of carriage and transportation. The productions not only relieve the weight of carriage but also buffer the pressures from loading. The proprietary material can provides extra steadying of the vehicle cabin and obstacle the movement. For example, there are successful verification for the mass rapid transit (MRT) and train system in Taiwan. By using 20 slices for each carriage, the weight of each cabin was reduced from 3,840Kg to 2,560Kg. It means the weight was decreased about 33%. Therefore, By the benefit of the honeycomb structure, the weight of MRT train and all kinds of vehicle cabin can be decreased and the energy will be saved more than 30%.

### Business Items

Cable-less Picking Tag

### Illustration of Main Products

This product has four illuminated colored buttons:red, green, orange and blue. Each button represents a sorting unit so that up 4 people (orders)/categories may be sorted simultaneously. The setup allows sorters to follow only the indicators in their given color. The key-in module software supports three operating modes: function key, dynamic indicator and in sequence lighting. The makes the picking process more flexible, reduces picking error and increases picking speed. The inconvenience of paper order forms is eliminated to provide manpower savings.

### Business Items

IC Design

### Illustration of Main Products

Although a fisheye lens has been applied to many devices for many years, system companies cannot provide a better "lens distortion compensation" solution that suitable for the human visual sensory using the fisheye lens. Also, no Taiwanese chip design company focuses on "the lens image distortion compensation". In fact, we can get advantages as follows if we implement mathematical algorithms through chip design.

I Support real-time performance

II Reduce manufacturing cost

III Get the best image quality for human visual sensory

Moreover, the AVS7101 expands the scope of application with fish-eye lens such as wide-angle rear view camera, wide-angle video door phone, wide-angle network camera

and medical endoscopy.

Heat Shrink Packaging Machinery and Material.

### Illustration of Main Products

There are 2 major item products we producing

Shrink Wrapping :

We produce shrink wrapping machinery including full range auto L-bar sealers, side sealers and bundle wrappers as well as film of POF, PE, PP ... etc. The shrink wrapping M/C & material are mainly working for

- I Superiority of safety protection for identifying in case the package is opened.
- II Promotion Facility, Group Packaging, as well as gift attachment packaging can achieve the sales promotion purpose.

Shrink Sleeving :

We make shrink sleeving machinery containing the options of high, mid & low speed label sleeving to suit Customers'demand. We also produce PVC, PET, OPS & PLA ... etc color printed labels, which are Multi-Colour Printing, for increasing the appearance and add - Value to the subjected products with cheap cost and easy accessibility.

## Business Items

Easywell Direct-Flow Reverse Osmosis System

## Illustration of Main Products

BIONET is the first leading cord blood bank established in Taiwan. The two major areas of business are stem cell storage & therapy, and genetic testing. The services include:

- I Cord-Blood (CB) Storage: CB contains Hematopoietic Stem Cell (HSC), and it is the main source of human blood and immune system.
- II Mesenchymal Stem Cell (MSC) Storage: MSC can differentiate tissues such as bones and nerves. It has many advantages such as the homing tendency and can adjust the immune reaction.
- III Baby Teeth Storage: Baby teeth contain stem cells which provides value when one follows Baby Banks technique to obtain pulp cells to establish isolation & purification process. The property of tooth stem cells is similar to Mesenchymal Stem Cell which can differentiate and repair the cells. It can be applied medically on the area of bone, nerve renovation, burned skin, periodontal disease or tooth transplant.
- IV Spinal Muscular Atrophy (SMA) Genetic Test: SMA is an autosomal recessive disorder with a carrier frequency of 1/30-1/50. If husband and wife are both carriers, the baby affected chance is 1/4. Currently there is no known cure, and can only be prevented through pre-birth screening.
- V Down Syndrome Integrated Screening Tests: The integrated screening test uses both the first trimester and second-trimester markers to adjust a woman's age-related risk of having a child with Down syndrome. This Screening method yields the highest detection rate
- VI Pre-implantation Genetic Diagnosis (PGD): Families affected by essentially any inherited disease can help reduce the risk to their children from suffering the inherited genetic disease through the use of PGD.

PeepHole Viewer

### Illustration of Main Products

The most basic home security is the front door. This is the primary entry point in the home, and the method to identify who is there has not changed in many years.

Insert Molding/Two color Double Injection Molding/Over Molding

- Simple push button activation to see large image without darkening the peephole
- Clear image in LCD Panel on door, easy to see for people of any height
- Compensation for low light images
- Compensation for “fish eye” distortion
- Zoomed live picture for easy identification
- Easy for children to use and see the LCD
- Easy for older people to see clearly who is at the door

Medical Bed –Including support surfaces - powered and non-powered, standard electrical bed frame and specialty bed frame

### Illustration of Main Products

CAREMED is a leading manufacturer and supplier of medical equipment. We pride ourselves in our product craftsmanship and quality, committed services in sales and customer support, swift production turnaround exceeding customer expectation, and utmost esteem for business ethic and intellectual properties.

From active decubitus ulcer management mattresses and bed systems to patient environment furniture; from durable medical equipment to disposable patient apparels and garments, CAREMED is dedicated to providing a total healthcare solution. Our principal operations are design and manufacturing of medical equipment, especially for the prevention and treatment of decubitus ulcer, reducing the risks associated with pulmonary complications in immobile patients, and prevention of embolism resulting from Deep Vein Thrombosis (DVT). Our product development services include OEM (Original Equipment Manufacturer), ODM (Original Design Manufacture), and tailoring existing product to meet your private labeling requirements.

### Illustration of Main Products

CASHIDO Ozone AntiBacterial Sanitizer is an unique revolutionary ozone generating device to produce ozonized water. Turn the tap water into sanitize water which can be used to sanitize, detoxify, deodorize, refresh and oxygen enhancing. It is compact, economical, easy to install and use. It generates safe level ozone water apply international safety regulation. Just turn on your faucet and you are entering a new clean environment. Your health will be protected by a sterilant to disinfect fresh fruits, salads, meats, poultry and seafood and other home usages.

CASHIDO Micro Bubble Bathing System provides new SPA concept at home and commercial spaces. The system is able to generate over billions of micro bubbles per minute, mixing air or ozone or even oxygen into water by high pressure process to make the water molecules saturated. The micro bubbles can deeply clean cuticle of skin, over million anions above water surface provide fresh air and health for human body. It also can speed up metabolism of the skin and make the skin brighter, elastic and prettier.

### Business Items

Double Glazing Blinds System

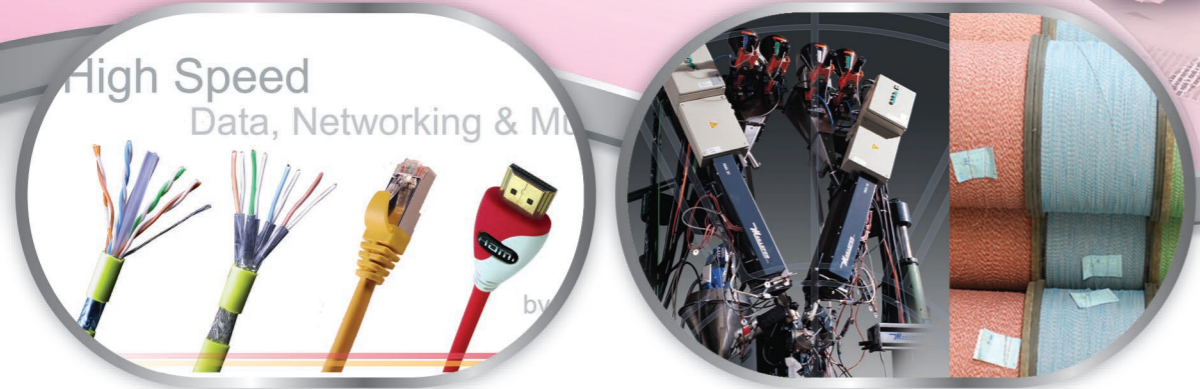

### Illustration of Main Products

This product places a set of blinds between two layers of glass to block out heat and UV radiation, saving energy during summer to relieve the workload on air-conditioning. Sound insulation is usually weaker near building windows and doors, though this was overcome through the use of double-glazing. As the blind is placed between the glass layers where there's no dust or mites, there's no need to clean the blind slats at all. The result is better indoor air quality and a more comfortable home environment.

About Pretec

C-One Technology Corp., also known for its brand name "Pretec," offers a spectrum of small form factor memory cards and card readers such as CF, SD/MMC, USB Flash Drive, and wireless communication devices for digital imaging, mobile communication, and industrial flash markets. As the 2nd company in the world to offer CF cards since 1995 and the company to create CF I/O and SD I/O cards since 1998, Pretec has consistently demonstrated the highest capacity flash cards in the world: such as CF 3GB, 6GB, 12GB, 16GB, 24GB, 48GB and SD 4GB, SDHC 8GB and 16GB; the fastest flash card in the world: such as CF 80X and 333X, SD 133X, USB 166X, and SSD (IDE/SATA) 400X. With more than 200 patents granted or filed, Pretec has also been offering the smallest USB flash drive in the world with unique technology: such as i-Disk Tiny ("Best Gear of 2003" by TIME Magazine) and i-Disk Diamond; the most reliable flash card in the world: such as rugged PCMCIA, rugged CF card, and i-Disk Bulletproof, a water-proof, fire-proof, and bullet-proof USB flash drive.

### Business Items

Micro Fuse

### Illustration of Main Products

The small size of this patented microfuse means that the space of printed circuit board (PCB) is halved compared to conventional fuses, while it achieves a short-circuit rating of up to 100A/250V. The design allows for automatic AI component placement at a rate of 3 fuses per second, far faster than the conventional standard of 1 fuse every 3 seconds. The design also has a lower contact resistance resulting in less power loss; the fuse offers improved circuit protection due to its excellent insulation, impact resistance and shock resistant design. It's worthwhile nothing that the materials used also meet the environmental standards of developed nations.

Window Roller Shutter

### Illustration of Main Products

The increasing severity of global warming means that energy-saving measures should be taken wherever possible. The slats in this environmentally friendly window roller shutter can stop sunlight heat so it is an excellent heat insulator. The graduate school of architecture at the NCKU carried out dynamic computer modeling of this product to simulate its heat insulation and solar shading performance-the green building concept will be put into practice with outstanding energy saving performance. If used on a large scale, it may save huge amounts of energy for Taiwan and enhance home comfort. Apart from blocking heat and sunlight, this product also provides protection against hurricanes and thieves. It can also be opened up to let a cool breeze into the room.

POS PC

### Illustration of Main Products

Frontier leads all competing products by being the first to introduce features such as stylish curvature appearance, user-friendly dual monitor operation, sophisticated splash/spill proof, and the extraordinary heat dissipation design. All the features allow Frontier to operate in a wide range of application area. Frontier's monitor angle can be tilted to suit each individual operator according to height and installation environment. Its modular structural design enables easier access for repair and maintenance. Powerful peripheral expandability and user-friendly, easy maintenance structure are also the innovative features of Frontier. As Frontier operates on a touch screen interface, it can be widely applied to retail industry (supermarket/department store), recreation and gaming industry (lottery/amusement park/race track), hospitality industry (coffee shop/fast food restaurant) for ordering/cashing operation and customer relation management, and service industry (hotel/airport/train station) for information and navigation.

## Business Items

Integrated circuit (IC) design.

## Illustration of Main Products

ENE Technology Inc. specializes in notebook computer-related key parts and components and other mobile devices. Currently its main product lines include a peripheral product series, an embedded product series, and a power management IC series.

Explains as follows:

Peripheral Product Series:

This series consists of key parts and components for notebooks; such as PCI bridge control elements, USB 2.0 card readers, USB flash disk controllers, and SD/MMC memory access controllers.

Embedded Product Series:

This series mainly consists of notebook keyboard controllers, embedded controllers, OLPC project, and a customized ultra-mobile PC (UMPC).

Power Management IC Series:

This series consists of voltage stabilizers, boost converters, power conversion IC, LED driver IC, Audio amplifiers, and fan control IC.

### Business Items

The business scope comprises Schottky Diodes, TVS Diodes, Zener Diodes, Bridge Diodes, Super Fast Recovery Rectifiers, High Efficiency Rectifiers, Transient Voltage Suppressors , Small Signal Diodes and Wafers, etc.

### Illustration of Main Products

Eris is an ODM (original design manufacturer), providing a variety of support services to design, manufacture and after-marketing services for Rectifying Diode products.

Rectifying diodes are kinds of key components in electronic devices such as Laptop, Motherboard, Cellular phone and the information peripheral products. Moreover, Automobile devices, Test instruments, Telecommunication equipments and other industries require diode application as well.

In terms of diode market, especially of Schottky, grows with the variation of application in consumption and information electronic devices. Furthermore, the replacement of the equipment will also boom the diode market massively. However, Schottky is our company major product and Eris is one of the worldwide leading companies in Schottky Diodes field.

To sum up, we are constantly focuses on the innovation of R&D which is based on our practical attitude and efficient management, providing high quality and good value products with excellent services to our clients. Our clients based consist of brand, global/regional-based OEM (original equipment companies), who provide an ever increasing array of services to their products development plans.

## Business Items

Semiconductor, Software, Video and Multimedia Product Business

## Illustration of Main Products

With the ever increasing of system complexity, factoring user-friendliness and maintainability while enhancing functionality therefore, has become a crucial R&D issue. Using a special chip technique, this product makes electronic product easy to configure, install, control, and even upgrade via USB interface of any form (AnyUSB™), without the need of any driver, application software, and professional skill. Etrovision maximizes the utility of this distinguishing feature while embedding USB port on each IP surveillance product. EtroLink™, the best practice in IP surveillance, takes only three steps to complete the setup, meanwhile guaranteeing across-subnet configuration and easy network setting. There is even no need of switching the power on. Reduce the total cost of ownership, enhancing the overall efficiency.

## Business Items

- I High thermal performance of Graphite PCB
- II HCPV
- III LED lamps
- IV Vanadium Redox battery

## Illustration of Main Products

- I Graphite is a very good thermal conductor with theory thermal conductivity , But the structure of graphite is SP2 crystal and with lots of vacancy in nature graphite. The best thermal conductivity for nature graphite is about 200~400 W/mK on X-Y direction and 5 W/mK on Z direction. We use different methods to create high thermal conductivity of graphite in all directions.
- II More than that, we create the Graphite PCB that can be used on LED , Solar and other industrial business as high thermal performance PCB to dissipate the heat.

Biotech Service

## Illustration of Main Products

R-Phycoerythrin (R-PE) is a phycobiliprotein extracted and purified from algae. Due to its excellent water solubility, strong signal, low background interference, and stable fluorescence performance, it is widely applied in biomedical field. For instance, it can be used as a fluorescence marker to amplify reaction signal in Microarray analysis and Flow Cytometry, therefore the instrument can detect quantified results. Furthermore, it can also be applied in Fluorescence Resonance Energy Transfer for the purpose of researching biological function and mechanism of action of medicine.

Innovated characteristics of the application target include:

- I Great quantity and rapidly indoor cultivation
- II The largest microalgae manufacturing plant in the world
- III World's only ready-to-use Lyophilized R-Phycoerythrin

The GeoVision GV-Compact DVR V2 is a mobile Linux-base video recorder that can display real-time Mpeg4 images from four cameras simultaneously. The recording frame rate of each video channel is adjustable to 30/25 fps at 720 x 480 (NTSC) resolutions. This product needs no PC installations and provides easy operation with GV-IR Remote Control. The GV-Compact DVR V2 has standard model for fixed surveillance and anti-vibration model for mobile surveillance. The anti-vibration model of the GV-Compact DVR has already been tested to withstand severe levels of shock and vibration in mobile environments. It is perfect to be installed in any vehicles, such as buses and vans, for surveillance and recording. This product supports GPS tracking, GV-GIS geographic information system, 3G mobile phone surveillance, and GV-Central Monitoring Systems. It has 16 language versions on web interface and 10 languages on OSD. The special design of the GV-Compact DVR enables you to link up with TV, VGA and spot monitors simultaneously for direct display. This product offers many features that you can expect to have.

- I Production of chlorinated paraffin, bleaches and hydrochloric acids for domestic use and for export.
- II Sale, import and export of plasticizers, plastic pellets and chemicals.

## Illustration of Main Products

Under the brand name of PLASTOIL, the company produces chlorinated paraffin from petroleum products. It is the biggest single-product plant in Asia and is highly renowned internationally. Purposes of products are described as follows:

- I Chlorinated paraffin is a good secondary plasticizer and flame retardant for plastic. It can also be used in paint, adhesives, rubber and textile industries, with the high chlorine content and good compatibility with base oil, chlorinated paraffin also serves as a good extreme pressure additive in lubricant for metal working fluid.
- II Hydrochloric acid, a basic industrial raw material, is used in the steel and iron industry, the chemical manufacturing industry, food processing, water treatment, etc.
- III Bleaches are ordinary detergents and disinfectants. They can serve as a sterilizer for swimming pools.

### Business Items

Production & sales of CERABO

### Illustration of Main Products

This product is designed to coat and sinter a layer of nano-TiO<sub>2</sub> photocatalysts to the ceramic board surfaces. It has improved the attachment of photocatalyst to the ceramic board surface. The Ohayo-Photocatalyst Ceramic Board, combined with the original big-area (320×120cm), low-thickness (0.4cm), high-flexibility CERABO ceramic boards, has been launched. This pioneering undertaking has converted ceramic boards from a traditional construction material to a multipurpose construction material. Owing to this product suitable for use in public spaces and residential environments, it has received the praise from all circles and was awarded the honorable “nano-mark” by the Industrial Development Bureau, Ministry of Economic Affairs, R.O.C. in 2005.

Bike Helmet, Equestrian Helmet, Sports Helmet

### Illustration of Main Products

The 360° lighting device is one of the entry's most innovative features. Using LED illumination and a freeform reflective strap to actively indicate the rider's position has significantly increased night time riding safety and poor visibility of the rider. Normal helmet only provide passive neck protection to the rider, while Hopus Ex-5 with lighting fiber increased the positive warning, and rescue signals. With patent in many countries, here are the list of main innovative value:

- I The first 360° lighting helmet
- II The first helmet with graphics printing on the shell
- III Committed to Green Policy and reduction of raw material
- IV Incorporate safety and comfortable

### Business Items

Information Service Technology; Meter Manufacturing

### Illustration of Main Products

In comparison to the traditional gas meters which function solely as a reading system, this product brings gas meter to the next generation of integrating wireless communication to safety usage detection. All the data are send wirelessly to a backend monitoring system of gas companies, where they are processed for analyzing, billing, and accounting services. During any event of emergencies, such as the detection of lose gas pipes, ICM-1000 would shut off the gas source and report such incident to the gas company through its integrated communicating unit. The communication functions both ways, whereas gas meters can be called upon at any given time. We believe that with this on demand monitoring system, it could bring our customers to a much higher level of safety gas usage.

### Business Items

High Accuracy Digital Inclinator(ANGLE 360)

### Illustration of Main Products

This product is an inclinometer that uses a built-in accelerometer to offer 360o full-range measurement to an accuracy of  $\pm 0.1$  degree. Digital technology is used to convert the analog accelerometer readings into digital signal outputs so the data may be shown directly on the LCD display. Designed to replace conventional liquid sensor inclinometers, this product does not rely no the human eye to judge the angle of inclination. It is also esay to calibrate and carry. With this product, horizontal/angle measurements can be made more quickly and accurately for all kinds of standard and custom measurements.

### Business Items

Manufacturing holographic films, paper, and foils primarily used for authentication, packaging and design enhancement, and promotion.

### Illustration of Main Products

Security Solutions, Holographic Films, Paper & Paperboard, Hot Stamping Foil, Cold Foil, Holographic Glitter Security Label

Using advanced holography technologies, we can create multiple security features such as 3D images, covert letters, microtext or nanotext in a small self-adhesive label for authentication. Using demetalization process, we can add serial numbers or bar codes to enhance the security and logistic functions. We can also make them into tamper evident labels with custom break patterns or destructible labels. Security labels are easy to apply and inexpensive to integrate with existing manufacturing operations.

### Business Items

Provide top-notch technology, first-class services, and absolute total solutions in RAID and Solid-State Recording Interface and Media products.

### Illustration of Main Products

Various functions used in Flash memory storage are coalesced to yield this IC Controller , used to drive USB 2.0 interfaced Data-bank Card Reader finish-products. The Controller eliminates the need for a host computer, as was the case in the past, in order to store data from Flash memory devices onto a Mass storage drive. USB 2.0 Data-bank Card Readers are able to read Flash memory media in SmartMedia, CF, SD, MMC, and MemoryStick formats and also support highly-stable and compact-sized Microdrives. These products are able to completely transfer data such as pictures (JPEG), videos (MPEG), and audios(MP3) files from the Flash media to a standard Mass Storage Disk Drive, without the need of personal computers as hosts. The USB 2.0 Data-bank Card Reader enabled by the Controller will not meet much competition as few others can match its innovation, in terms of concept, and comprehensiveness, in terms of functions.

## Business Items

Technical Service & Patent

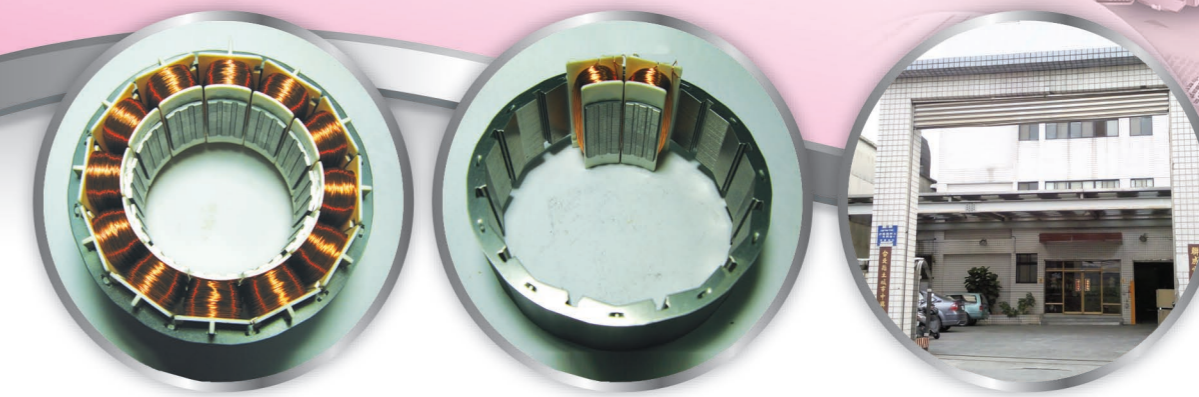

## Illustration of Main Products

Kyoritsu Optronics had solely successfully developed a new wide-viewing angle MVA/LCD technology. This technology eliminated all protrusions and ITO slit geometries, which are commonly used in all current MVA/LCD displays. This invention not only reduces fabrication cost and improves yield, but also greatly increase LCD's transmittance and contrast ratio. Moreover, by also applying a special pixel design and driving system, we further achieved better image quality. In addition, we have obtained faster gray-gray response times with normal driving IC. Our wide-viewing angle LCD technology is currently the lowest cost, highest yield, and best performance wide-view angle MVA/LCD display patented technology in the world.

## Illustration of Main Products

PowerTracer BiKM is the first all-in-one hospital management platform, featuring multi-functions such as finance, customer data, operation process and also with high-quality. It not only creates the value by integrating all of the data and transforms it into professional knowledge but also saves time cost and assists the advisor to make precision judgments.

- Healthcare industry management solution
- Balance Scorecard Solution
- Data Warehouse , Data Mart & Business Intelligence Solution
- Knowledge Management Solution
- Total Solution for Joint Commission on Hospital Accreditation(JCI)
- Healthcare Financial Management Solution
- Satisfaction Survey Solution
- Healthcare Customer Relationship Management Solution
- Human Resource Management Solution

## Business Items

Twist Wire Pair Flat Cable ; Electric wire & cable machine

## Illustration of Main Products

High-Definition Multimedia Interface (HDMI) is currently the hottest digital audio/video interface standard. Transmit audio and video signals using a single cable. As it is not direction specific, it requires human recognition and arrangement during machining. Therefore, labor costs and product defect rates are very high.

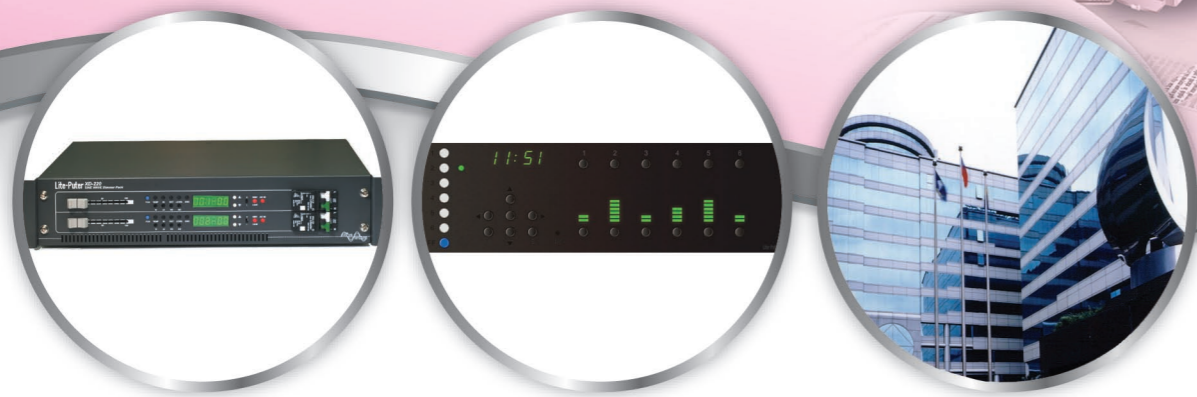

The TWP flat cable can address the manufacturing problems of HDMI and make fully automated processing possible. Not only can this make production more effective, but it can reduce labor costs. In respect of wire material structure, the material can develop its physical limits to effectively reduce transmission distortion and thereby represent audio and video accurately and clearly.

Formagraft Collagen Bone Graft Matrix

### Illustration of Main Products

This product is an artificial bone void filler designed to replicate human bone tissue. It is made mainly from collagen and bio-ceramics. The purified collagen has excellent bio-compatibility, reducing the severity of immune reactions and promoting the repair of cancellous bone, providing a matrix for bone regrowth. Bone void filler helps to stimulate bone regrowth when introduced with the patient's own bone marrow until the body eventually absorbs it and replaces it with new bone. This product is now in widespread use among major North American hospitals.

Inkjet Nozzle Plate 、 Micro Metal Mesh or Aperture Plate 、 2D/3D Stamper 、 Micro Piezoelectric Pumps 、 Laser Material Processing 、 Micro Electroforming 、 Micro Laser Welding 、 Micro Sprayer Module 、 Efficient Cooling Solution

### Illustration of Main Products

Portable Micro Sprayer is the latest integrated product made by MicroBase Technology Corp. We use LIGA technology to form a metal nebulizing plate which bonded a piezoelectric component and combine a piezoelectric micro pump to develop a new nebulizing system. Portable Micro Sprayer is the first product which can stably deliver liquids to nebulize automatically in the market. It just needs 3 AA batteries or 5V USB power source to nebulize liquids and consumes less than 2 watts. The energy consumption is only 1/10 to compare with the conventional sprayers. It also can produce over 1,000,000 negative ions per cubic centimeter and provide the utilities of environmental protection and health. At present, Portable Micro Sprayer is applied to humidifier and fragrance diffusing. We'll develop the technology to other fields about home use, vehicles and even drug delivery in the future.

### Illustration of Main Products

Innovative Dual Differential Ratio Feeding 4-needle 6-thread Flat Seaming Machine

- I Patented "Dual Differential Ratio Feeding" – a pioneer design in the industry, highly improving the sewing adoption of various fabrics and the sewing quality.
- II Patented "External Stitch Length Adjuster" – a pioneer design in the industry, enhancing the convenience for both sewing by operators and maintaining by technicians.
- III Patented "Fixed Rear Needle Guard" – a pioneer design in the industry, advancing the availability of maintenance to avoid needle broken, stitch skipped and to cause waiting in the production line.
- IV Patented "Hidden Triple-scrape Oil Seal", totally preventing the fabric from oil stain problem by the needle bar.
- V Patented "Unique Needle Clamp" design, being easy to clean up and minimizing the damage.
- VI A retainer is included in all MJ62GX series for seaming light/soft materials, retaining the tension of bottom thread, and avoiding the seam crumpling.
- VII Simple & easy conversion between basic model and extended special/functional model.
- VIII Patented "New Anti-oil-leakage" design, adopting special mechanism and high-quality oil seals to diminish the possibility of leakage from machine head.
- IX Patented "Hi-lux LED Assist-light" design, uplifting the brightness in sewing area and the sewing quality to conform to the benefit from energy-saving and environment protection.
- X Manifold assist devices and gauge sets are available as options, being easy and simple to install and to use, to satisfy various sewing requests from garment factories.

JPEG2000 DVR :

To have a stable system with clear picture, NTIC provides JPEG 2000 codec DVR, a better solution compares with MPEG4 and MJPEG codec in the CCTV industry. Although the high technique requirement of JPEG2000 increases our production cost, we have fewer competitors in the market then.

Concealed Camera :

Neotech concealed camera is specially designed for high level security or concealed monitoring applications such as bank, ATM machine, airport, museum, detective, spy and home security. The outlook design was just like an ordinary wide-angle mirror. Meanwhile, the front cover was made from a patented high-tech material which can not be seen through by human eyes, yet can be seen through by camera. Therefore, it will be hardly recognized as a camera. The purpose of this design is to keep high image quality by using high performance camera with concealed outlook.

### Business Items

Integrated forming high-pressure -proof and heat-proof carton

### Illustration of Main Products

Corrugated cardboard boxes (known as honey-combed boxes) are usually used during shipping to prevent goods from getting damaged or crushed. The protection usually consists of a carton(box) and several partitions (along the X and Y axis). To seal the box, the upper and lower covers must be taped shut. This kind of packaging involves many components, is expensive, time-consuming to assemble and pollutes the environment. On the other hand, this product is of one-piece construction, can withstand high loads and is made from recycled materials. As it creates less waste, is lighter, uses less material, uses fewer resources and is cheaper to produce, this green packaging material is both environmentally friendly and economical to use.

### Business Items

- I Product: Penpower Handwriter Series / Penpower VoiceWriter Series / ScanEYE Series / WorldCard Series / Penpower Chinese Expert Series / Intelligent Video Surveillance
- II SI solution: Penpower has vertically integrated the five existing recognition kernels—Handwriting Recognition, Voice Recognition, Optical Character Recognition (OCR), Business Card Recognition (BCR), Biometrics Recognition and Security—into key technologies, applying these technologies to PCs, PDAs, communications, the Internet, electrical appliances and so on, providing a cross-platform recognition software solution.

### Illustration of Main Products

- I Penpower Handwriter has a simple-to-use, light and slim design in an array of choices. Traditional or Simplified Chinese, Hong Kong characters, Japanese and Korean writing, English, numbers, even symbols—all can be recognized easily, even mixed together, with no restrictions on the sequence or style of writing.
- II Penpower VoiceWriter lets you input to any applications by just speaking. You can then input by speaking at the usual rate of speed and you will be able to input about 100 words per minute.
- III ScanEYE lets you digitize printed information. You can easily and directly use what you've input or translated with Microsoft Office (Word, Excel, PowerPoint and so on) and other applications, without some conversion program.
- IV WorldCard provides total solution for managing your contacts. Able to recognize multiple languages, WorldCard scans a business card and automatically inputs all card information into the proper database fields, including the person's name, company name, title, address, and telephone number.
- V Penpower Chinese Expert (PCE) is a comprehensive Chinese learning environment. You can learn Chinese from any sources such as Chinese web sites, books, newspapers or magazines.
- VI TrackIN iDVR is designed to tackle the drawbacks of the traditional DVR, labor intensive, inefficient, and ineffective. It provides Line Crossing, Missing Object, Restricted Area, Object Counting and Architecture Diagram functions.

Network Attached Storage products

### Illustration of Main Products

Full range of RAID storage product, NAS Solution & iSCSI Solution.

The products provide all storage interfaces including SAS, SCSI, iSCSI, SATA and Fibre Channel.

- I The Epica EP-4429S/D-F4A3 RAID subsystem features 4Gb F/C host performance to increase system efficiency and performance. It features high capacity expansion, with 42 hot-swappable SATAII hard disk drive bays in a 19-inch 4U rackmount unit, scaling to a maximum storage capacity in the terabyte range.
- II DN 500A-CM is designed to satisfy the growing needs of NAS and bring next generation digital life to home users, especially SOHO and businessman, at Double-A level such as Access Remote and Auto Rebuild. Proware's DN 500A-CM high capacity, including free software, so multiple users can simplify and automate a continuous backup process without any manual instruction.
- III Proware has launched a series of SAS RAID storage units, models SB-3163S-F4S3(4Gb/s FC-SAS), SB-3163S-S3S3(SAS-SAS) and SB-3163J-S3S3(SAS JBOD). The SAS RAID subsystem features 4x mini SAS port for high capacity expansion, up to 7 SAS/SATA JBODs (total 128 drives) can be connected to expand storage capacity, to give a maximum storage capacity of 128 terabytes (at 1TB SATA drive).

### Business Items

Designing, manufacturing, and sales for all of locks and hardware parts

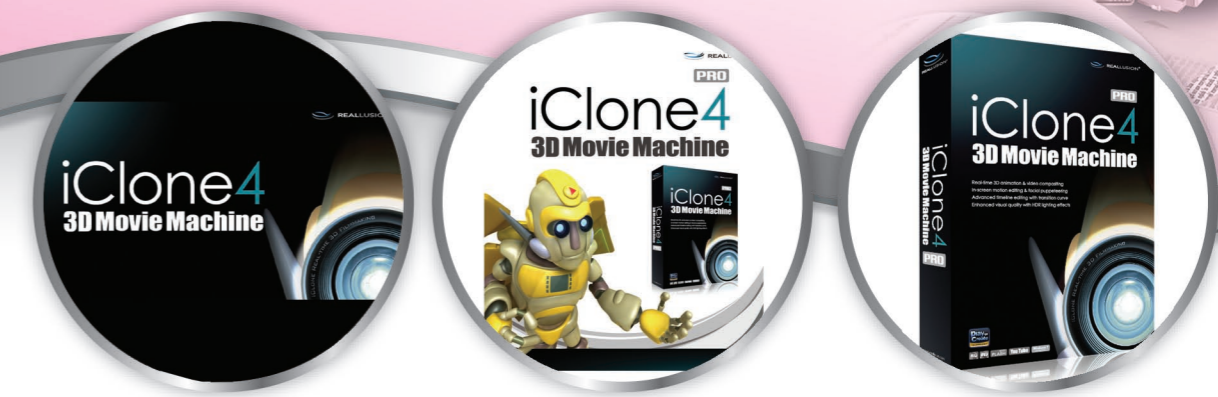

### Illustration of Main Products

This product is designed to improve the service procedure and management for lockers. Without the need of a key, the user may set a 4-digit password to lock the locker. As no key is carried around, it cannot be lost. In so doing, this invention brings much convenience to users and administrators. If a user forgets the password, the administrator may use the "Override Key" to open the locker and use a probe to find the original password. Besides, there is a card module, which can combine with a club's original membership management system. As one card can only operate one compound locking device, it can effectively prevent practical jokes.

Wireless Body Temperature Monitor

### Illustration of Main Products

It is not common for the wireless body temperature monitor in the world home-care market at present; especially it combines the advantage of the traditional products and the brand new technology altogether which is the pioneer in the world. With the better function to meet the user's requirement, the product itself is much competitive.

In addition to the traditional ear temperature measuring function of the thermometer; Rio's products could also 24 hours auto-monitor the body temperature during the long-term duration of sleeping to whom has fever and it would give the alarm automatically to avoid the inconvenience of the hand-operation measuring.

With the wireless auto-monitoring function, it offers the better & more convenient new operation way of body temperature monitoring; suitable to the infants, children and the olds.

The armband is made out of the one piece food-grade silicone with the great design of human engineering.

The soft and comfortable armband offer the great comfort to the user during the long-term wearing of monitoring.

### Business Items

Carbapenem

### Illustration of Main Products

Carbapenem is an ultra-broad spectrum antibiotic drugs in clinical as well as the spectrum of action includes

( I ) many gram-positive bacteria, ( II ) gram-negative bacteria, and ( III ) anaerobic bacteria. Our major products, Imipenem, Cilastatin, and Meropenem, belong to subgroup carbapenem. In contrast to other beta-lactams, it is highly resistant to degradation by beta-lactamases or cephalosporinases that can produce enzymes that break down antibiotics, rendering them useless. In addition, it is stable to DHP-1(dehydropeptidase-1) and doesn't co-administrate with Imipenem to block the renal metabolism in the kidney. It also has a reduced potential for causing seizures in comparison with Imipenem and becomes a superstar in pharmaceutical industry.

## Business Items

Automation Equipment manufacturing

## Illustration of Main Products

To the Equipment industry of PCB, stability and efficiency are the very important points that not only satisfied our customers but also increase the condition between the competitions among the customers.

The equipment shortens the cycle time and increases the capacity up to 50%. The major attraction of the robot system cuts down the cost \ enhances the speed and flexibility, and is also operational friendly.

Also, we solved the cost problem and invented the product successfully at first phrase. In the very beginning of developing the product, we met and solved lots of problems and yet provided solutions promptly in hardware \ software and signal communication and birthed our products smoothly.

Our goal is to succeed among the various competitions of PCB industry and the robot system world-wide, and also is able to be extensively applied in other industries in the future.

### Business Items

Manufacture and sale of a wide variety of high-performance connectors including DC Jack, Earphone Jack, Optical Jack, Mobile Phone connector, RF connectors, Cable and Hinge applying to Consumer, Computer, Communication products

### Illustration of Main Products

SIMULA products widely cover the connector areas such as

- I DC Jacks
- II 3.5/2.5mm audio Jacks
- III opto Jacks
- IV RF connectors
- V mobile phone connectors
- VI USB, HDMI and Display Port series
- VII Hinge series

Simula has been devoted to the design and materials field in order to produce connectors with good quality and competitive price.

Our products have been adopted by many worldwide famous brands distributed over Europe, North America, Mid East, Africa Central, South America, Asia, Western Europe and Australasia.

SIMULA connectors are developed through a multistage R&D process, which includes analysis, design, simulation, development and implementation. And we allocate up to \$1.4 million annually in R&D to develop new connectors that are smaller and more efficient. Our R&D staff can design and mold a custom connector for computers, cell phones, TVs, cameras and other electronics. We've been providing ODM services to leading companies for audio jacks and DC power jacks since 2003.

### Business Items

Functional Fabrics

### Illustration of Main Products

Different from traditional waterproof and water-vapor-permeable fabrics, our products have not only perfect waterproof and water-vapor-permeable properties but also excellent breathable characteristics. Our fabrics are designed specifically for sport and outdoor wears, people who wear them not only feel comfortable while in outdoor activities but also can put them on in rainy or snowy days. Especially in rainy day, our fabrics have higher water vapor permeability and the people who wear them will feel more comfortable than any other comparative international name brand products.

---

### Business Items

Sliding Bike

### Illustration of Main Products

This product sidesteps the conventional Folding Bicycle design concept and combines a bicycle's functions with mechanical principles to create a newly patented product. Its advantages are ease of storage/assembly/disassembly since it takes only a few seconds to reduce the amount of space the bike takes up. The bike can be stored in narrow urban spaces, quickly folded for small elevators and car trunks or even taken aboard the MRT to commute. Since it's so portable, parking and theft is not a problem in urban areas. The seat and handlebar distances may both be adjusted according to the user's height and preferences. Making it a comfortable way to get to work or go riding.

### Business Items

IP developing and licensing. Mainly for image and video related IC & system applications

### Illustration of Main Products

Taiwan IMagingTek Corporation, TITC has developed world best expensive, lowest power lossless compression IPs (so named "TITC-NLS") which is applied to digital image/video related IC/System products including Digital TV, LCD display panel, digital camera, WebCam, SmartPhone, DVD/BR, DV/DVR and mobile phone consumer electronic products. This IP and its derivatives solve bandwidth issue which not only reduces memory/system cost, but also sharply cuts down the power consumption and eases of system EMI headache. This IP, a far leading technology has been granted 6 US patents (another 50+ pending), and has successfully realized in world top companies products including German Micronas(Trident-NXP), Japanese SONY, Panasonic, Sharp, Kawasaki, Renesas, Taiwanese Sunplus, Orise and Korean Samsung and LG. TITC has set a model of licensing technology to world top companies.

Refractometers, auto circuit testers, auto battery equipments & accessories, automotive specialty & windscreen tools, auto parts, anti-freeze testers, radiator flush kit, auto battery testers, and Borescope, Video endoscope, Video inspection scope, Fiberoptic scope.

### Illustration of Main Products

Inspired by customers, Three-in-one has been developing a variety of endoscope for several years. We have developed our IGS series in 2002 and started to sell it on year after. A positive feedback of IGS from the market motivated us to do further quality improvement. That is, our corporate-level managers believe that by digitalizing and visualizing our endoscope, we can differentiate our endoscope from similar products. As a result, VIGS and MIGS have been invented in 2004 and 2006, and then launched for sale in 2005 and the end of 2007. Until now, those two series have very good sales performance especially in North America and Europe.

### Illustration of Main Products

Name of Subject: Ultra Precise Fiber Optics Automatic Coiling Machine

- I Upgrading traditional industries into high-tech industries.
- II The subject was catered to traditional wire and cable industry initially. Proposed to upgrade to fiber optics industry, thus increasing the output value.
- III Upgrading the original manual operation into automatic control system with neat and tidy arrangement of fiber optics.
- IV The Subject has been awarded with three following patents:
  - ( I ) The improvement of Coiling Machine (Patent No. M343671)
  - ( II ) The Fiber Optics Removal Device, applied on the Coiling Machine (Patent No. M 343672)
  - ( III ) The Tension Control Device, applied on the Coiling Machine (Patent No. M 343897)
- V Integrated the theory backing from four Mechanical Drs. and 24 years of practical experience, and being approved of the Industry-Academy Cooperation Project. Currently promoting the subject to the world through internet marketing. Customer feedback has been positive, with some customers already placing orders.

## Business Items

iVCM6554 (intelligent Voice Coil Motor)

## Illustration of Main Products

Currently the micro-motor technology used for auto-focusing in camera phones has reached a bottleneck in terms of size, noise, cost, supply and output. This product offers the best solution at the moment with its one-piece mechatronic design (motor and control IC) using a closed-loop feedback control system to focus the camera lens. It has now been patented in many countries. Advantages include stable production yields, low cost and low profile. The product is particularly important as it is the only camera auto-dominated by Japanese and Korean suppliers.

High Power LED Street Lamp 、 Lighting RD&Manufacture

### Illustration of Main Products

Wanstar is a professional LED lighting manufacturer. We produce high- power and high-wattage streetlights, pendant lights, tunnel lights and downlights. Wanstar's high wattage LED lightings are designed by heat dissipating at ease themselves plus low wind resistance modulus. We use a high-tech heat dissipating material to make the lampshade and the whole lampshade is the only one heat dissipating device. We can control the heat dissipation of high wattage LED lightings in a state of constant temperature. Our heat dissipating technology can widely reduce the temperature from 75°C, which is a universal data in the market, down to 50°C.

New Age Antenna · Car use Antenna · Consumer & Innovation Electronic products · Voice control & light control products.

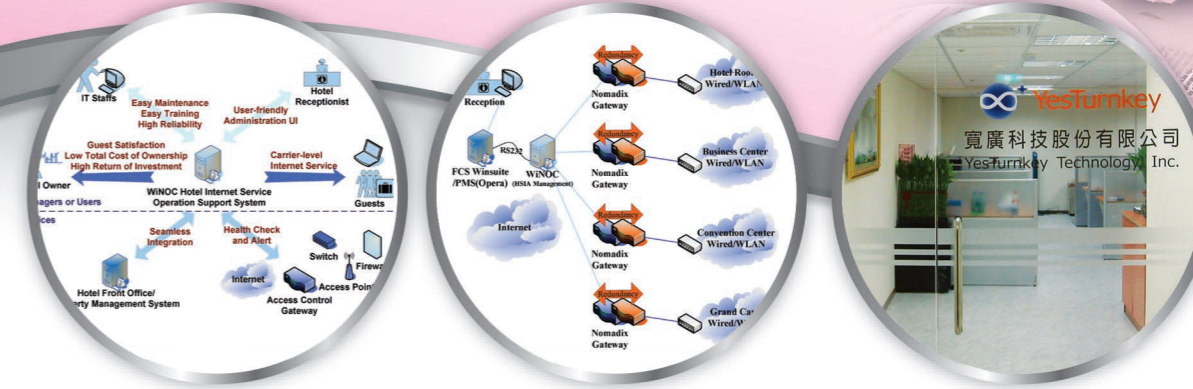

## Illustration of Main Products

Developing an AM/FM mini-antenna with outstanding signal-receiving ability has long challenged the industry. Having overcome past technical obstacles, we have successfully developed an AM/FM integrated mini-antenna. Moreover, it retains over 90% of the receiving ability of a standard antenna. The shape of Shark's fin, compact, multifunctional, and low-cost, this gadget is expected to gradually replace various types of traditional vehicle antennae. Currently it has entered the automobile supply chain system. In the future, it will combine with more other antenna functions and be incorporated into new automobile designs. Its prospects are looking up!

Hotel Internet Service Operations Support System

## Illustration of Main Products

This system is designed to provide the hotel industry with a total solution for offering telecommunications grade network services. The innovative system design integrates "account management" and "network equipment management" so the system acts as a substitute network administrator that automatically monitors the network's operation and generates alerts. For reception staff with no professional IT knowledge, the system may also provide them with updates and suggestions at the administrative interface or troubleshoot guests' connection problems. By supporting fully automated account management and integration with the existing hotel service processes, the system offers an effective way to reduce a hotel's operating costs.

SuperGuard GPS Tracking, Security and Fleet Management Systems

## Illustration of Main Products

SuperGuard is a worldwide recognized brand that stands for everything related to GPS tracking and location based services for all types of applications, such as personal safety, vehicle and asset tracking, as well as marine and aircraft use.

The PT03 Universal Tracker is a mobile GPS tracking and communication device, integrating latest technologies in the field of GPS, GSM and Iridium satellite communication. The vehicle tracking and security devices VT-02 and VT-05 are optimal for fleet management and commercial data centers, with customizable configurations and data upload over GPRS or SMS, and access of such data through Internet and mobile phone browsers.

All SuperGuard products work with GSM 2.5G, 3G or 2-way satellite communication and are designed for professional and commercial use with service platforms and information system networks, such as web based tracking, logistics and fleet management and emergency response.

We provide own service platform as well as turnkey solutions and customized service and data center solutions. All software and web applications are developed in-house, utilizing a great variety of maps, reports and management tools.

Traditional Faucet(ECO faucet)

### Illustration of Main Products

Our latest innovation-ECO faucet has implemented the patented Thread-Lock technique which has replaced the traditional casting and forging methods. With the new processing method, it has noticeably decreased the pollution problem and drastically cut down the production costs by 40% which is considered the lowest among the manual faucets. ECO faucet weighs only 25% of the traditional manual faucets.

With a breakthrough of the patented Thread-Lock technique, ECO faucet presents clean-cut edges and corners for a more smooth and stylish look which overtakes the traditional manual faucets. Various colors and spout shapes are available for creating a modern and fashionable atmosphere in the bathroom setting. ECO faucet provides variation to meet the different needs of our customers.

ECO faucet is also the toughest health guard for the end users by becoming NSF-61-9 certified which is considered the highest US standard for water sources. ECO faucet ensures the end users enjoy the purest water!

Manufacturing of Spectacles and Lenses

### Illustration of Main Products

Established in 1997, Darwin optical designs, manufactures, and makets high quality Polycarbonate ophthalmic lenses. We are proud of being self-reliant in every stage of lens manufacturing processes. Starting from the optical design of lenses, precision mold making, lens injection to different coating process, each step is completed by skilled engineers and well-trained workers, maintaining the highest of standards and quality control. The self molding manufacturing skills ensure better control on the lens' quality and provide more flexibility and efficiency during the production process.

Darwin offers a broad range of quality premium polycarbonate lenses from single vision, bifocal, progressive, as well as Rx lenses with different designs and various treatments. With our extensive product offerings and commitment to quality, Darwin PC lens products are among the best in the optical industry.

Paint scraper & Home Improvement Hand tools.

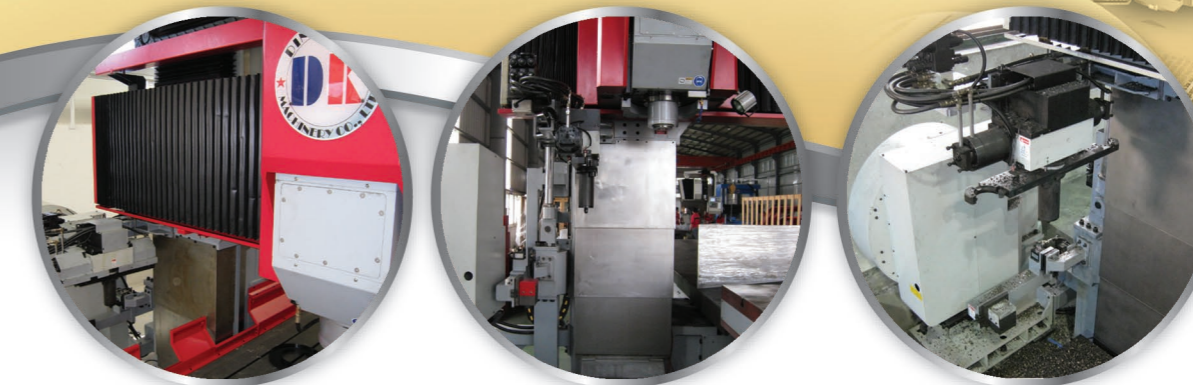

### Illustration of Main Products

- I With more than 25 years manufacturing experience, Dess Industrial has become the leading hand tool factory in Taiwan while our R&D team has become the industry leader. A fast growing company, established in 1983, we cover the needs of diversified customers, from OEM and ODM to direct supply to stores all over the world. The experienced R&D, production, and quality control teams can provide you with the highest quality service. Implementation of the ERP and AS/RS system has given increased management and production efficiency. Constantly updated high-tech machinery can fulfill your most sophisticated requirements. Synchronizing with the customer's software, we use the most advanced AutoCAD & Solidworks for sketching product drawings and use a 3D printer to provide prototypes to meet the customer's requirements almost immediately.
- II Creative "Human Friendly" design ideas have resulted in more than 30 worldwide patents such as DuraGrip, ErgoSoft & ErgoTap , which are now very famous around the world. In the recent years, our business has expanded from putty knives, and scrapers to a full range of home improvement tools such as painting, drywall, masonry, plastering, concrete, ceramics & adhesives, carpets & flooring, wall covering tools & other hand tools to provide greater choice for a range of different customers.

### Business Items

CNC Double Column Machining Center

### Illustration of Main Products

The machining center with a relay tool exchange device can improve the machines' disadvantage which it needs the crossbeam and the spindle drop to work when the machines exchange the tools. We set the exchanging device in side of the tool magazine, under the one of sides in the crossbeam also fix the upper exchanging device, there is a delay tool exchange device which it can up and down between the two exchanging device set in side of the column. The delay tool exchange device has dropped down when the spindle processes, the tools will move to the delay tool exchange device by the lower exchanging device, and the delay tool exchange device will rise to the side of the upper exchanging device for ready to exchange the tools. After the spindle finishes operating, the machining center can exchange the tools via the upper exchanging device and get the required tools continue processing. So, the machining center achieves the purpose that it no needs to drop down to exchange the tools.

### Business Items

Easywell Direct-Flow Reverse Osmosis System

### Illustration of Main Products

Conventional R.O. water purifiers work slowly so water must be stored in advance inside a reservoir. Over time, the reservoir tends to breed bacteria, become rusty or even, on rare occasions, just simply explode. This produce internal piping design and advanced RO film technology means that it can produce a regular flow of drinking water without a storage reservoir. This makes it a "filter on demand" water purifier. The patented quick-change filter core design also allows the filter to be changed without using any tools. With streamlined external styling and bright colors, this product breaks with tradition and offers a whole new interpretation on what a RO water purifier should look like.

### Business Items

Manufacturer and supplier of water conservancy, environment, geographic monitoring equipments

### Illustration of Main Products

The Suspended Sediment Concentration Meter SSC-100 is the first equipment in the world which can directly measure the suspended solid concentration (SSC) in liquids. It breaks the limits of existing optical backscatter sensors and ultrasonic turbidity transducers. There is no need to convert turbidity values into suspended solid concentration, and therefore no measurement errors due to transformation.

After a number of long-term in-situ verifications, SSC-100 has been proven that it works under varied sediment types with great measurement accuracy, especially in dramatic SSC variation situations; moreover, it provides multiplexing and wide measurement range. No electronic component is included in the SSC-100 probe, and the probe has great weather resistance so it can be applied to every kind of hydrologic conditions, very suitable for reservoir and river SSC monitoring. Benefited with the real-time and first-hand monitoring data from SSC-100, authorities can extend the life span of a reservoir with appropriate operations during rainfall events, or manage the generation of hydroelectric power.

### Business Items

A SERIES EQUIPMENT OF UV EMBOSSING MACHINE

### Illustration of Main Products

This machine which is principally designed to coat UV resin over PET film so that the surface can produce an optical effect-lightfast and glare-proof, can produce diffuser, BEF and two-in-one film. Adhesive is applied using multiple coats to simplify the optical film manufacturing process. Multiple optical film production equipment is integrated into a single machine. This reduces the cost to the film manufacturer and diminishes the clean room's space used. In the meantime, it cuts down the manufacturer's labor cost and strengthens competitive advantage.

CC-28917DVXT  
1/3" Color High Resolution Weatherproof Infrared Vari-Focal Camera with ICR.

### Illustration of Main Products

It is hard to adjust the focus of lens of conventional outdoor Vari-Focal cameras, but now we have a breakthrough technology for outdoor cameras (CC-28917DVXT). The lens focus of our outdoor camera can easily be adjusted by operating the magnetic outer controller. It's not only convenient but also simplifies the installation.

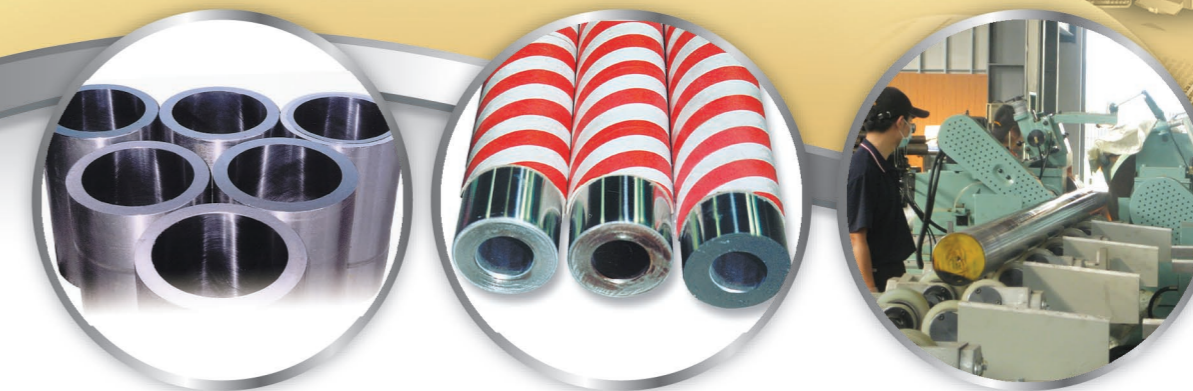

#### Features

- \* 1/3" Sony Ex-View CCD Image Sensor
- \* Outdoor installation
- \* True Day & Night Camera with Mechanically Removed IR Cut Filter.
- \* 28 IR LEDs
- \* Radiant distance 25 meters (at least)
- \* Built-in Auto Iris Vari-Focal Lens
- \* 550 TV Lines.
- \* Outdoor Controller adjusts the focal length of the Lens.
- \* Tough weatherproof metal housing design.
- \* IP66 Waterproof Resistance.
- \* Line Lock.
- \* Heater
- \* Minimum illumination at 0.5 Lux, F1.4 (0 Lux with IR)
- \* 4.0mm~9.0mm, F1.6 Auto Iris Vari-Focal Lens

Infrared activated Sensor Faucets, Flush Valves, Showers and related electronic components

### Illustration of Main Products

E-5000 Series Automatic Faucet is with the following features:

- I All-In-One Design Concept--  
All control components were integrated efficiently in a faucet body by minimizing inside components such as: PCB, Solenoid Coil, Water Valve and simplifying wetted surface area,
- II User friendly Operation---
  - ( I ) Unique electronic control module design allows for faucet electronic component diagnostics.
  - ( II ) Sensor Eye Positioning eliminates ambient reflectivity issues.
  - ( III ) Self-Adapting Sensor Distance adjustment eliminates the need for manual sensor adjustment.
- III Unique energy saving design---
  - ( I ) Elaborated electronic programming and Solenoid Valve leads to long battery life.
  - ( II ) Battery powered version uses (4) inexpensive AA Alkaline batteries.
- IV Quick Installation---  
Swift joint of Flexible Pipe for easy and quick connection to water supply, the main stem screw right on deck for quick installation.
- V Easy and Saving Maintenance---
  - ( I ) "Clam shell" design allows quick "above the deck" access to all major faucet component parts for easy battery change and maintenance.
  - ( II ) Built-in, replaceable filter screen to reduce maintenance costs.

### Illustration of Main Products

The block rock climbing wall "Skycube" is a cubical structure with six sides connecting mechanism.

Like Lego, it is designed to assemble with one another. But unlike Lego which assembled using only its two sides, Skycube can be assembled six sides. The result is a free standing rock climbing structure with lower cost, easier assemble, more versatile and more fun than transitional climbing wall.

Climbing wall assembled by Skycube can provide four sides of wall for climbing, both indoors and outdoors. User can design the difficulty of rock climbing by simply changing the combination of Skycubes.

Skycube is an ideal tool for rock climbing training both for children and adults.

### Business Items

MACHINE EQUIPMENT MANUFACTURING · PLASTIC PRODUCTS MANUFACTURING · KNEADER & EXTRUDER MANUFACTURING

### Illustration of Main Products

Traditional waste recycling technology using milling machine and mixing roller, has the problems of installment complex, operation not easy and many manpower operation. Also the output is actually little, that is unable to conform to the economic efficiency.

The EVA waste recycling process equipment designed by the idea of "3R" – reducing, recycling and reusing, has automatic recycling procedure, consistent work, and also operation simply to save the labor's efforts & time. Moreover, the productivity can reach 150 kgs/per hour. Causes to make use of the EVA waste material reproduction effectively, the enterprise not only reduces his production cost, but decreases the environmental pollution. After promotion this type equipment, we already have sold worldwide and have very successful sales.

### Business Items

Hand power puller, Ratchet tie down, Trailer winch, trailer jack

### Illustration of Main Products

- I HAND POWER PULLER: J&K Hand Power Pullers are suitable for moving vehicles, boats, logs, machines and other heavy objects. All models are fitted with ratchet safety devices. Trouble-free thumb control release for maximum safety powerful ratcheting systems while pulling heavy duty load. It is perfect for all your demanding pulling applications, fencing, landscaping and moving heavy equipment. Be it emergency, recreational, agricultural or industrial, J&K Hand Power Pullers can do it all.
- II TIE DOWN: J&K Tie-Downs are used to secure valuable cargo in the bed of your truck or trailer! It's great for cars, motorcycles, ATVs, boats, and tarps. Features non-slip, easy-to-secure/release buckles and vinyl coated hooks on each end of the straps. The strap is designed to be extra abrasion resistant for a long and useful life. Choose the product that best meets your needs.
- III TRAILER WINCH & TRAILER JACK: J&K Trailer Winches are designed for easier loading of your small boat, Go Kart, ATV, lawn mower, cargo, etc. They include a comfortable handle grip for a positive hold while cranking. An anti-corrosive finish is superior for corrosion resistance even in saltwater environments, strong winch drums and pressed steel gears to resist wear and last longer. J&K Trailer Jacks are an excellent design for boat trailers, industrial and agricultural equipments to ease loading and un-loading, as well as raising the trailer to a proper height or angle.

Building management system \ Li-iron battery \ Integrated management.

### Illustration of Main Products

It uses solar power principle, which allows the energy to charge the battery in as little time as two hours. It' s mobility allows ease of on-site charging anywhere from, the convenience of your own home, to the class rooms at school. With a complete charge, children are able to utilize its optimal power of lighting when needed for studies during times of low lighting.

Well equipped everything is built in, allowing easy operation by its user. Allowing light visibility output when needed. The Lamp is constructed of simple material; the lampshade is made of durable material which is able to resist substantial impact, to avoid damage to the bulb.

Led lights have longer hours of illumination with greater life expectancy. Led bulb illuminations are brighter if not equivalent to bulbs with higher voltage which are more fragile, like the standard convention bulb.

Pliers , Adjustable Wrench

### Illustration of Main Products

As a specialist of pliers in Taiwan, serving our clients with quality products is always our goal to achieve. Starting from forging (including making the forging die) to the finished products, we insist to complete each process in our own factory. Lion believes this is the only way to maintain outstanding quality. Moreover, in our value chain from designing to finished product is based on the constantly monitored and improved ISO 9001 : 2000 Quality Management System Cutting edge is the soul of pliers. Our advanced harden technology and high power diode Laser hardened cutting edge offers a better hardness performance as well as an upgrade cutting life cycle than ever!

The innovative composite workmanship in the field, Lion combines the metal and fiber glass successfully. It offers our E. space Wrench a greater torque performance, which is 45% more than ASME, but with a super light weight. To experience less fatigue, more comfort, and more ergonomic gripping feeling, you must try our new 3rd generation E. space Wrench.

As the first VDE high insulation certificated manufacturer of pliers in Taiwan, Lion has the strongest R&D team that offers our precious clients the best ideas on grips designing. Furthermore, we pay all our attentions on every detailed testing step to insure that we 100% guarantee customer with the safest insulation pliers in the world.

### Business Items

Manufacturing / Application / Marketing of Far Infrared Aerospace Carbon Fiber Electric Heating Fabric

### Illustration of Main Products

Conventional Heating Pads :

- I Cheap metal wire is the main heating material, heavy and stiff.
- II Conventional heating pad operates with alternating current of 110 or 220 volts, the users may get an electric shock when there is a faulty design or misuse.
- III The power is about 60 watts with equivalent temperature of 50~65°C, more than our skin can take for long-time usage; it might harm our skin tissue and it is not energy conservation.

USB Far Infrared Hot Wraps overcome the drawbacks that mentioned above.

- I Use carbon fiber fabric as the heating material, light, thin and soft and emits far infrared naturally. Other than thermal therapy, it can also encourage blood circulation and accelerate metabolism and ease the pain and tiredness.
- II 5 volts direct current voltage is especially designed for safety. It won't cause any harm even contact with human bodies directly.
- III The power is less than 5 watts, and consumes less energy. Our special design can spread the heat evenly and effectively deep under the skin.

Omni-Directional Vibration Switch

## Illustration of Main Products

Optical Type Omni-Directional Vibration Switch – VBS04 is the foremost vibration switch around the world to use optical sensing function. It can sense random vibration from various angles in any position (both vertical and horizontal) . Compared to traditional vibration switches, VBS04 can avoid oxidization and abrasion. The signal of highly reliable photo transistors is also extremely stable and can remain sharp for several years. The main application of VBS04 is to detect slight vibration. The applications include Car Alarm Systems, Household Security Systems, Earthquake Detecting Systems, Portable Electronic Alarm Devices, and touch switch... and other applications that concern vibration detecting or shock impact signaling.

## Business Items

Traffic engineering and traffic supplier

## Illustration of Main Products

This product is the pioneer among all the solar-powered signs in the world. In addition to utility of solar power and LED in traffic signs, its innovative slim surface-mounting design provides a solution to break size and content limitation of existing solar-powered LED signs. As a result, it can be applied to large-sized traffic signs, lighting up every kind of information for road users.

Its greatest innovation is to highly improve legibility of traffic signs, especially large ones during nighttime or bad weather conditions. It guides road users with a brighter and clearer sign to help them find their way safely. When traffic safety is enhanced, safer roads are promised.

YES VISE

## Illustration of Main Products

- I Creativity: excellence for mini components and improves the workpiece capacity greatly.
- II Flexibility: provide a variety of YES VISE including different types. There are 2 types for that normally, vertical and horizontal. Also, we could offer different types of jaw plates for customers choose.
- III High Precision: the advantage of this design is that the precision could be controlled within 0.005 mm so that the workpieces can't be lifted up easily comparing to the prior design.
- IV Long Lifetime: avoiding the chips to drop down for main screw. Easy to clean the chips of iron to increase the lifetime greatly.
- V Humanity Operation Interface : Using the wheel handle to drive the main screw and 2 jaw plates to lock the workpieces properly. It could be efficiency for disassembling and easy to clamp. For the mini components , that would be unnecessary to use the vise locked block to increase the height. Users just be accordance with the step jaws thickness to clamp even make that stability. For the original design, the screws be pushed by 2 vise locked block only.
- VI Unique Design: dovetail design, easy to adjust the accuracy of each coordinate.
- VII High Efficiency: the original design were horizontal , but for this new development is for vertical. Under this conditions, the new development could be installed more vises then the production capacity could be increased around 10%~ 50%.

Axial Preset Gauge

### Illustration of Main Products

SYIC-17910 Z Axial Preset Gauge is applied in the area of adjusting cutting tools' height and instruction for the machining. It can also be applied for general machine industry and industry machining. Therefore, both the vertical type and horizontal type CNC Machine Center and CNC Lathe are applicable. This product can be returned to zero and adjusted without accessories and can read whatever size is needed. Besides, it has a strong magnetic power and is able to gauge the side. The operation process goes with the indicator at the same time. The indicator adopts the inserting type. It is easy to read numbers and will not get damaged. Z Axial Preset Gauge is the basis of the machining. In the mean time, it is also the origin of machine power and direction. It is a bridge between the machine and workpiece. Its function is like a sword worn on a warrior's waist. By means of mutual communication and interaction, it shows the power of the accurate preset gauges.

Laser Cutting 、 Circular Sawing Machine 、 Pipe Bender

### Illustration of Main Products

The new SOCO SA-78NCE brings you the latest technology in High Tensile Steel Tube Sawing. Its unique design and cutting system brings the highest saw blade life in such applications, as well as unparalleled performance and speed.

Machine Features:

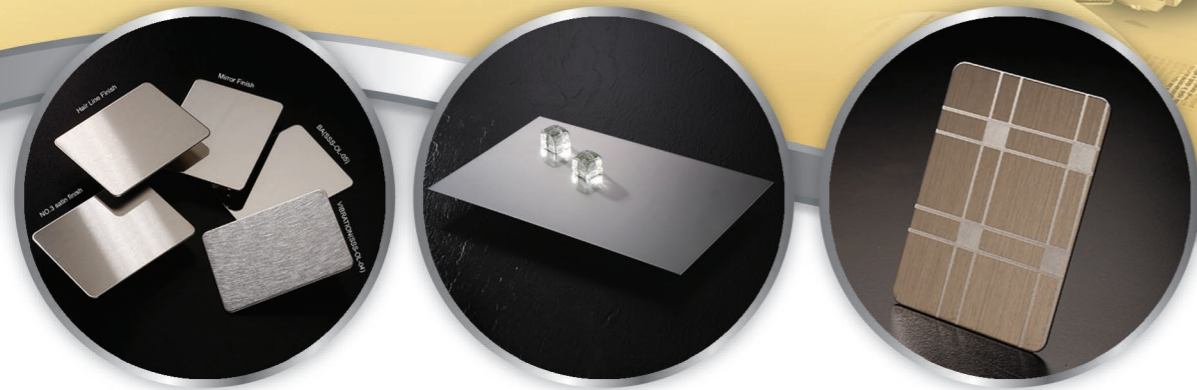

- Especially suitable for Cutting Automotive parts such as Impact Beams, Chassis and Cross Bar tubing
- High Tensile Tube Cutting (up to 120 kg/cm<sup>2</sup>)
- May be equipped with 2 different Saw Blades ( TCT and HSS Saw Blades )
- High Speed Sawing: the average sawing cycle times can be up to 4.5 seconds for most sizes.
- Electric Servo Controlled Feeding and Cutting
- i2® ( Intelligent Interface ) control system. Touch Screen Graphical Controls with Automatic Recommendation of Cutting Parameters. 3 ~ 5 minutes setup time between most tube sizes
- May connected to SOCO' s Deburring ( BDB-70 ) / Chamfering ( DEF-FA/76-V ) , Washing + Air Blowing ( TWD-3000 ) , Length Measuring ( LM-3000 ) and Stacking ( STK-3000 )

### Business Items

Grain Dryer, Solar Water Heater, Rice husk fumace

### Illustration of Main Products

“Suncue SB series rice husk furnace dryer” takes advantage of far wastes, rice husk, to replace diesel or gas as the thermal energy provider for grain dryer. It is not only reducing drying cost, but also is the only solution for overcoming the smoke pollution of husk furnace in the world. “Suncue SB series rice husk furnace dryer” has exclusively passed the air pollution for environmental test and performance test in Japan and Taiwan. World-leading innovation and constant hot air temperature control technology can control hot air temperature  $\pm 1^{\circ}\text{C}$  with full automatic drying. With unique patented complete combustion technology, paddy husk from 1 hectare of farm can dry approximately 3 hectares of wet paddy. Paddy husk from 1 ton of wet paddy can dry approximately 3 tons of wet paddy. The energy efficiency is triple. Drying cost can be reduced significantly and rice quality is improved.

『SUNCUE SB series rice husk furnace dryer』 has been successfully exporting to Japan, South East Asian nations, Europe, Central and South American countries.

Rice husk is biomass energy, its CO<sub>2</sub> net emission is zero. 『SUNCUE SB series rice husk furnace dryer』 is the best solution for environmental protection, energy saving, low carbon and earth care.

### Business Items

Mist Cooling System

### Illustration of Main Products

This system can lower temperatures, increase humidity, remove odors, suppress dust and fight fires. The innovative one-piece system pressure relief mechanism replaces conventional electric water valves ,electric pressure release valves and timers ,resulting in a significant reduction to cost and product dimensions. Most conventional misting systems also require the pump pressure(usually 1000psi) to be manually adjusted when nozzles become blocked the sudden increase in pressure frequently causes accidents like burst piping .This system uses a self-regulating design so that no matter how much water is used in the misting system, pressure will always stay at 1000psi and prevent any accidents.

## Business Items

cow leather

## Illustration of Main Products

- I Soft leather:
  - As implied by the name, it is a kind of leather with a soft touch. It is the major and mass-produced product of the company. Currently, it is the main product supplied to PACCESS for its bulk purchasing.
- II FLOATER soft leather:
  - This product was originally developed from natural grizzly leather and has a natural pattern, good softness, a nice touch and lightweight coating. However, if the patterns were not of the same size, it was difficult to cut the leather to match the patterns on the pair of shoes, and thus the cut loss of the leather was too large. Therefore it changed into floater leather to increase the utility rate and still maintain the natural and excellent softness.
  - It has the advantages of excellent softness, a nice touch and high utility rate. It is usually used in making basketball shoes and loafers.
- ◆ Drum Dyeing Aniline:
  - It is usually called “aniline finish leather” or “ manual dyeing leather”, and as its name implies, it is not coated with any paint. Therefore, Grade-A leather should be used with Full Grain surface.
- ◆ Nubuck:
  - Its features are similar to the Drum Dyeing Aniline, so Grade-A leather should be used. However, the leather surface for this product should be ground finely to provide a velvet surface.
- III Pull-up:
  - This kind of product is usually called oil pull-up leather, including crazy horse leather, PULL-UP, etc. It is usually used in making heavy-duty shoes, such as hiking shoes, work shoes, etc.
  - The shoes made of this kind of leather are waterproof feature, i.e., maintenance-free, and thus they are a favorite of busy people.

.....

### Business Items

Self Drilling / Tapping Screws, Hand Tools, Drywall screws, Chipboard screws, Roofing screws, Window screws, BI-METAL and more.

### Illustration of Main Products

- I Product : self-drilling screws and self-tapping screws.
- II Product function: the screw is fastened on the object that needs to be fixed, the to the rotation and insertion by the threads allows the object to be tightly fixed.
- III Applications: suitable for various kinds of machines, buildings, furniture, transportation, electronic equipment and consumer appliances. It market sales channels are widely distributed, but the products are especially suitable for construction.
- IV Feature :
  - The products are resistant to cavitations and have excellent adhesion, low expansion and are beneficial to construction, and suitable for large factories and roofs.
  - The products are resistant to corrosion so that they are suitable for a marine environment, such as usage in sea transportation or coastal buildings.
  - The products are resistant to stress and cracking. They are suitable for heavy loading connecting equipments or long-term operating equipment that is resistant to overloading and breakage.
  - The products can be used to match up the requirements of various kinds of surface processes. The penetration depth can be up to 15mm.

E-mail : [stainless@yueseng.com.tw](mailto:stainless@yueseng.com.tw)

.....

### Business Items

- I Slitting, leveling, cutting and grinding services for stainless steel plates and coils.
- II Manufacture of cold formed seamed stainless steel tubes for building structure.
- III Manufacture of stainless steel tubes for piping.
- IV Manufacture of ARC welded large diameter stainless steel pipes.
- V Light gauge stainless steel pipes for ordinary piping.

### Illustration of Main Products

Due to the excellent anti-corrosion and mechanical properties, various magnificent stainless steel products are widely applied in architectural industries, automobile, electronic products, art works and etc. To fulfill customers' demand, Yue-Seng offers diversified Stainless steel products including sheet, coil, tube, angle, and pipe.

For these many years, Yue-Seng devotes and insists on customer satisfaction, upgrading innovation, and advancing quality. By holding following strategies, we maintain stable growth in the highly competitive international market.

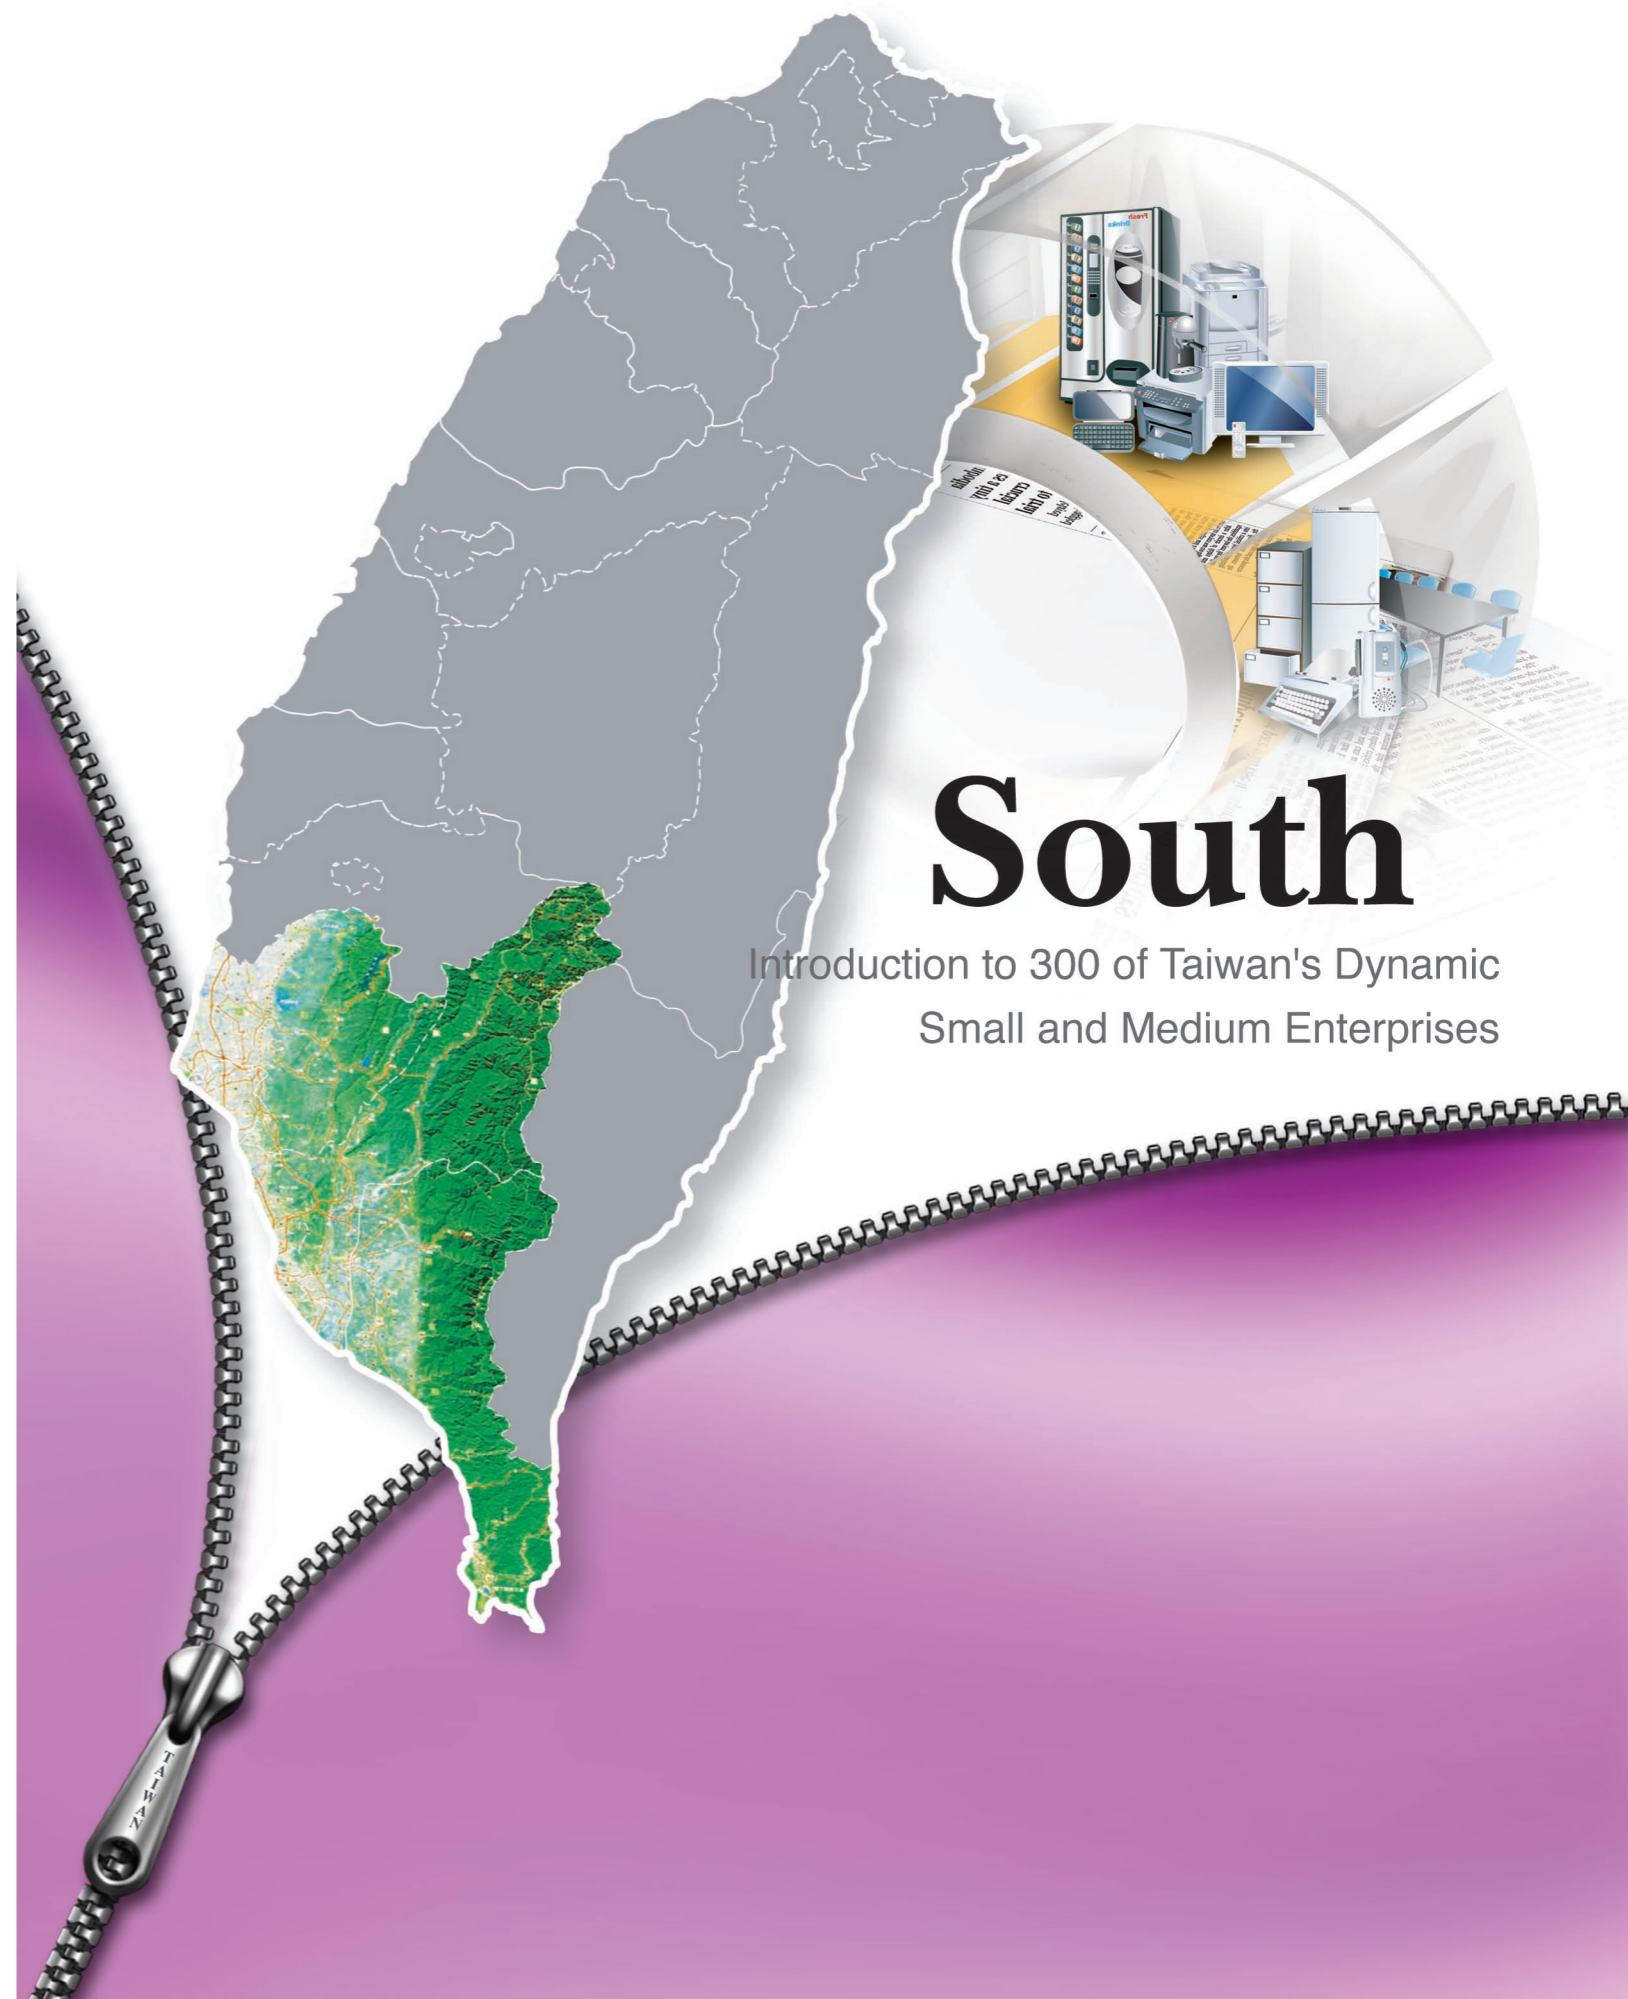

- I Faster responsive system, decision making, and order delivery.
- II Offer diversified and high value-added products to avoid price competition and products substitution.
- III Focus on long-term and win-win relationship with customers. Yue-Seng acts to fulfill customers' demand and constantly get repeat order from current customers.

At present, we certified with CNS, ISO9001, ISO14001, and OHSAS18001 to meet higher quality standard.

## Business Items

Biofertilizer, Biopesticide

## Illustration of Main Products

Biofertilizer:

- I Fert-P: Phosphate-solubilizing bacteria have the ability to promote plant growth by re-releasing phosphorus in soils and increasing the absorption of phosphate.
- II Fert-Root: Arbuscular mycorrhizal fungi can increase the absorptive surface of the plant roots and thus help plants to capture nutrients.

Biopesticide:

- I Vigor BM: *Bacillus mycoides*(BM), an endophytic bacterium, that lives within plant's tissues can enhance the growth of the host plants and further protect the plants from diseases.
- II Vigor BS: *Bacillus subtilis*(BS), a common soil microorganism that competes with and suppresses pathogenic microorganisms, such as *Colletotrichum* spp., *Glomerella* spp., *Puccinia* spp., *Fusarium* spp.
- III Vigor MA: *Metarhizium anisopliae*(MA) is a kind of entomogenous fungi which has great potential for the biological control of insect pests.

### Business Items

Conductive Paste Applied on Crystalline Solar Silicon Cell - Silver Paste, Silver-Aluminum Paste, Aluminum Paste.

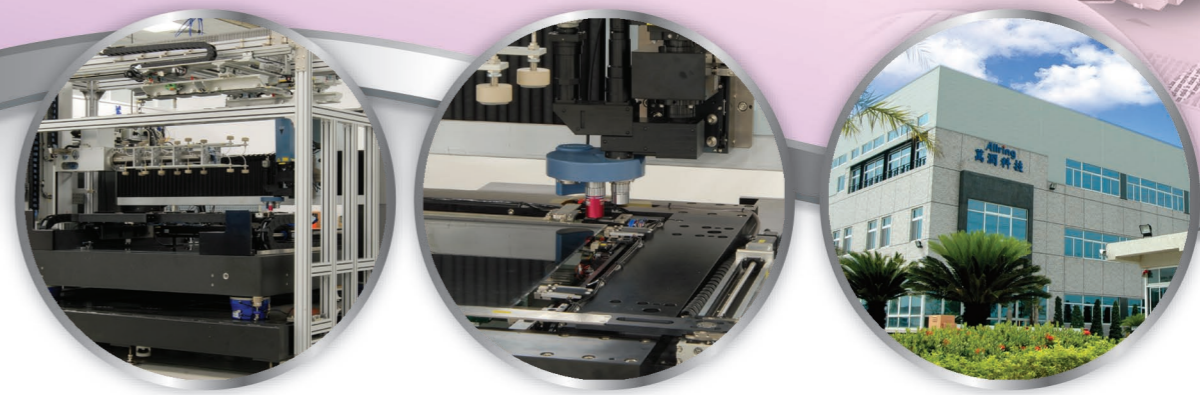

### Illustration of Main Products

The quality of conductive paste has a direct impact on the conversion efficiency and production yields of silicon-based solar cells. This product creates a very fine coating with excellent properties in terms of conductivity, adhesion and solderability. The sintering temperature could be lowered while silver wire height can be increased and width decreased to improve conversion rate. The major constraint on production yield rates is the quality of aluminum paste as this causes aluminum pins and droplets during manufacturing. After sintering, excessive warping then causes the solar cell to crack during packaging. This product has been proven to deliver better performance on the above issues, with the decreased warping providing a significant boost to production yields.

## Business Items

DNA Molecular Diagnostics

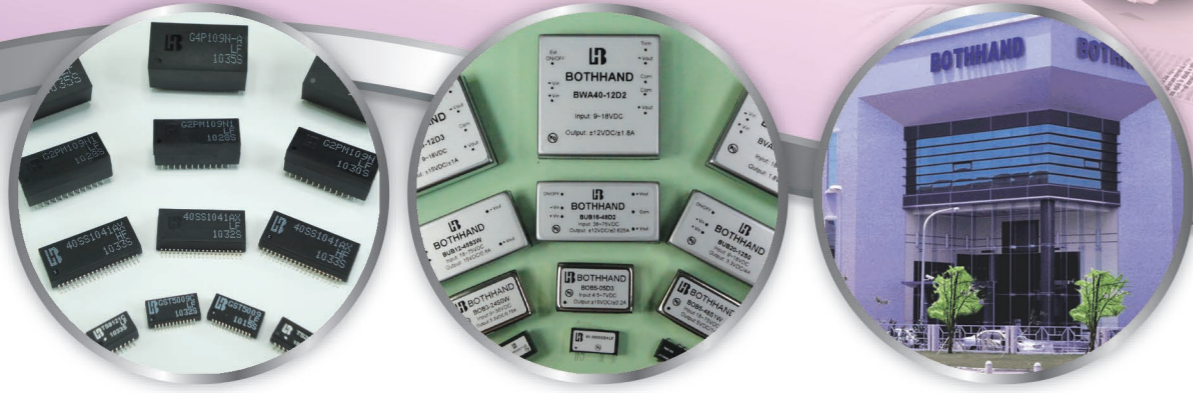

## Illustration of Main Products

The AsiaGen Mycobacterium tuberculosis (MTB) Detection kit is a quick test which reproduces MTB nucleic acid with a biologically active oligonucleotide primer by applying the liquid chip principle, followed by a hybridization reaction. It has a wide range of applications in clinical specimen testing, including testing respiratory tract secretion, serum, blood specimens, and organs. In particular, it has a high detection rate in detecting phlegm smears as false negative. The results from the clinical tests of 552 cases by the National Taiwan University Hospital suggest that this kit is highly sensitive (96.7%) and specific (95.2%), and that it can detect up to 3fg MTB, better than other same-level detection kits.

### Business Items

E-M school security network system

### Illustration of Main Products

This system combines RFID technology and SMS messaging so that when students pass through the scanner at the school gate, the system automatically records the time and date of their arrival/departure in a database. If a student fails to appear at school, the parents are automatically notified via the SMS in case the student was kidnapped or involved in an accident. Teachers can also use this system to manage student profiles, results and payments as well send SMS notices with the click of a button. This reduces the number of worries for parents and teachers.

### Business Items

Full Automatic CNC Bending Machine and Assembly

### Illustration of Main Products

Traditional tube bending machines mostly adopt hydraulic transmission systems. Their disadvantages include low precision, low speed, and pollution to the work environment. As a result, this product adopts an all-electric transmission system, along with the head of an internal patented speed reducer with planet gears and a unique mold clamp. This allows the servomotor to develop to its maximum efficiency. In addition, a rotary head makes the movement direction of the bending arm more flexible. This can reduce the occurrence of interference and collisions and fully meet the needs of pipe bending. Besides, this product offers a full three-dimensional machining preview. The entire machining process and finished product can be viewed prior to machining, so it is relatively convenient.

### Business Items

Oxy-hydrogen Generators, Solar Technologies, Solar Heaters

### Illustration of Main Products

Epoch's EP-350 Generator can produce 1800 liters of Oxy-Hydrogen mixed gas per hour. It can be used in numerous applications and is an environmentally friendly, highly efficient and safe alternative energy source. The Epoch EP-350 can be used for industrial, commercial and household applications, such as steel cutting, welding & brazing, glass & acrylic work, food processing and small-scale cooking. For example, using oxy/acetylene for cutting steel, the most commonly used method today, surfaces require preparation before cutting. A great deal of smoke is created during the cut. The material after cutting needs to cool before it can be safely handled and cleaned of slag and loose debris created during the cut. With our EP-350, the steel surface requires no preparation. Because our fuel results in a high-temperature, concentrated flame that produces no smoke, faster cutting time and lower heat transfer to the remaining material.

We combine theory, practice, and expertise to provide customers with the sound project planning and integrated service. Our products include SimMAGIC series (SimMAGIC Designer, SimMAGIC eBook, SimMAGIC SPM and SimMAGIC LMS), E-Learning (web planning & set-up), Business Intelligence system (KM planning & set-up), Digital learning Material (planning & production), Enterprise Information Portal and E-commerce (plan & set-up).

### Illustration of Main Products

SimMAGIC Reporter is a creative software package providing new application platform for solving process simulation requirements. Users can learn via the platform using interactive simulation teaching materials and know their learning problems through the software's evaluation program. Base on the learning results provided by the platform, companies can plan and set up an agenda to reduce users' mistakes. SimMAGIC Reporter also allows managers to monitor the training progress and outcomes accurately. In sum, it helps to save the huge costs of traditional training.

SimMAGIC eBook replaces traditional books with multi-media electronic techniques. Combined with interactive design, it provides not only reading function but also simulation examination. With a simple and humanized platform, it's easy to use SimMAGIC Designer to produce e-books with words, pictures, sounds, animation, and films.

## Business Items

LED lighting and Solar-product Application.

## Illustration of Main Products

- LED lighting advantages of optical structure technology
- I With the same illumination level, ISTI lighting cost is 60% lower. LED belongs to high-priced products, therefore, when it applies to any products, we can use LED lighting optical structure to reduce LED cost.
  - II With the same lighting cost, ISTI illumination is 2-3 times against other LED products. The illumination will be varying because of distances of lamps.
  - III Illumination and even light performance match with the standards of Illuminating Engineering Society of North America- the largest illumination to the averaged illumination can not be over 5:1, and the most ideal condition is 3:1.
  - IV The deduction of the quantities of LED reduces issues of heat emission.

### Illustration of Main Products

Common shutters usually use hinges as movable spindle button, but it will lack of aesthetic feeling in totality, using hinges with a long time will bring many problems like airtight \ watertight \ durability and safety caused by getting rusty ; Due to it, using straight axis design can improve the spindle button design deletion, and make the product much more conform to customer' s needs. Our product has following advantages :

- I The shutters module's carrying capacity could increase, and it will not out of shape with load, so it could increase operating convenience.
- II It's easy and time-saving to install or uninstall, so it can decrease timing cost.
- III It can increase robustness \ airtight \ watertight and aesthetic feeling with difficult to be out of shape.
- IV The up and down locking design is easy to switch, and it can increase safety.
- V The windowing angle could adjust with location, so it could increase safety and convenience.
- VI The shutters could open by one-side or both-side, so it will make our visions become broader.

### Business Items

Professional R&D and manufacturer for metal fasteners

### Illustration of Main Products

KTX-Torpedo Screw is our latest patent design. It is designed to be used in all kinds of soft/hard woods, such as Chipboard, Plywood, Red Oak, Thermo Timber, Composite board and etc.

KTX-Locking Drive provides superb stick fit quality and strong torque transfer that allows one-hand operation with ease. The unique thread design can fast grab the wood, low driving torque that saves the worker's installation time with less fatigue.

With KTX-Torpedo Screw, no damage to the wood and the wood surface is smooth and clean without splitting; its high ductility characteristic can sustain the shock of exterior force and loading strength from all directions. KTX-Nano Coating is optional for outdoor application, good adhesion that outlasts other inferior outdoor fixings in corrosion tests.

- I SMD Packaging Materials: Paper Tapes, Top & Bottom Tapes.
- II Laser : Laser Trimmer, LED Tapping Machine, Laser Related, Equipment Parts , Laser after service
- III Surface Mount Technology: Solder Paste Inspection, Laser non-contact Scanning
- IV Network Communication: Power Line Communication Technology.

### Illustration of Main Products

We aggressively brand our name, "LASER TEK." With our reasonable prices, Just-in-Time supply system, stable resources and ambitious management, we continuously promote our brand to Asia, Americas, Europe and the Middle East. We want to solidify our business territory.

- I For Surface Mounted Component Packing Materials, One-Stop-Shopping solution as the core advantage. We use the highest quality materials for our products in all of our factories. The entire production process, including purchasing raw materials, slitting, punching, winding and others are automated to supply passive component manufacturers for packaging purposes.
- II For Laser equipment, we provide high precision laser devices, laser optic parts and other products. Utilizing the most advanced laser core application technology, we promote and sell parts under the "LASER TEK" brand.
- III For SMT equipment, We are the authorized agent for selling solder paste inspection devices and automatic optic inspection devices. We holds a distribution advantage and is able to satisfy the diversified needs of SMT customers: meeting all their demands is our mission.
- IV For Information service, our company's new network communication products have successfully penetrated many consumers' office and family network environment.

### Business Items

Manufacturing and selling helmets

### Illustration of Main Products

The performance of a high-end helmet is also represented the riders' image as well. Therefore, an excellent helmet shape and multi-functional helmet is such an important factor same as motorcycle's function and its surface. This flip up helmet owns lots of patents protection and several innovation designs throughout the worldwide. Such as its unique design of air grooves in order to upgrade its aerodynamic ventilation. Furthermore, the design of internal liner with ventilation mesh to ensure the suitable fitting and comfortable. More efficiency to reduce the air noise with particular visor patent design and especially without any tools to replace the visor. This helmet is also certificated with worldwide homologations such as ECE 22.05, DOT, AS1698, CNS with its safety, fashion appearance, lightweight and all removable 3D inner liner design. The main purpose is to provide the users/riders a helmet to be more convenient, more comfortable and maximum safety as always.

Digital Mobile Microscope

### Illustration of Main Products

Vitiny® Digital Portable Microscope, Model no. PRO10

PRO10 breaks the conventional microscope style, have a 2.8" TFT monitor, can magnify 200x. It integrate with digital image and optical technology, as well as multi-lighting sources with side view LED for increasing sense of three-dimensional observation and anti-light reflection. Allows you to take photos, video and image output on PC or TV, measure dot size by built-in scale. It also comes with a professional measurement function in the application program.

Let you freely observe objects anywhere. There are 5 kinds of small supporters for observation aid

Supporter :

I shallow contact cap: to help observation of soft materials like cloth, wool, paper, hair, skin etc.

II deep contact cap: to help observation of SMT components, screw, coin etc.

III non-contact supporter: to help observation of wound, flower, insect, narrow area etc

IV deep tank: to help observation of worm, water, rock etc.

V shallow tank: to help observation of fish eggs, spore, sand, drop, diamond etc.

All in all, Vitiny Pro10 is more than enough for quality control inspection, security identification, personal care, education, medical observation and so professional microscopy needs. Streamline design, fine wire lines surface treatment showing its sleek and professional image, providing the best professionals in various fields of microscopy experience.

### Business Items

CVD precursors 、 Nano Material 、 Coating 、 Nano Material technology development and application

### Illustration of Main Products

By applying nano ceramics coating on zinc-plated fasteners can significantly improve corrosion resistance of the fasteners, comparing to the traditional hexavalent chromate process or the more environmental acceptable trivalent chromate process. Therefore, the hazardous hexavalent chromate chemicals can be abandoned completely. Besides, there is no water rinse after the coating process, the water usage and waste water can be minimized. Never-the-less, due to the superior performance, by using thinner plating thickness combining with the nano-ceramic coating can already achieve the satisfactory performance. Therefore, this nano-ceramic application is a process with not only improving performance, environmental friendly, minimizing of the wastes, simplified procedures, but also cost saving. Due to so many advantages, this process has been approved by many automotive companies for the fastener production.

Yebi e-commerce platform, application development, Internet marketing boutique

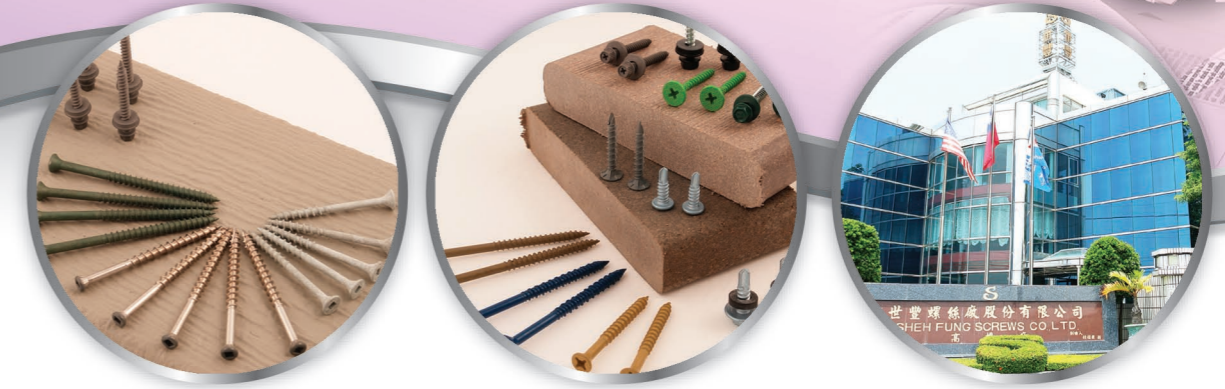

## Illustration of Main Products

As the Internet increasingly becoming so pervaded, the e-commerce has become an indispensable mode for the current society. Compare to other firms, our company constructs a different type of business model by combining and fully integrating the two information system and human resources information systems sufficiently. Furthermore, by using these two types of systems, users can transform their invisible values such as Knowledge Economy & Knowledge Management(i.e. innovation and data) into tangible value(i.e. profit and reduce transaction cost). On the other hand, the two systems direct the current knowledge industries toward to three new dimensions (namely, information technology, traditional industry and knowledge industrialized). Therefore, it will help the company to develop a new commercial business model in the near future.

Active Pharmaceutical Ingredient manufacturer

### Illustration of Main Products

Chlorzoxazone is a centrally acting muscle relaxant used to treat muscle spasm and the resulting pain or discomfort. It acts on the spinal cord by depressing reflexes. It is sold as Muscol or Parafon Forte, a combination of chlorzoxazone and acetaminophen. Phenylephrine is an  $\alpha$ 1-adrenergic receptor agonist used primarily as a decongestant, as an agent to dilate the pupil and to increase blood pressure. Phenylephrine has recently been marketed as a substitute for pseudoephedrine. As a nasal spray, phenylephrine is available in 1% and 0.5% concentrations. It suffers some rebound congestion effects, although to a lesser degree than oxymetazoline. Phenylephrine is used as an eye drop to dilate the pupil to facilitate visualization of the retina.

### Business Items

PE Carrier Tape

### Illustration of Main Products

Conventional carrier tape is made by laminating together layers of virgin wood pulp from a slow-growing timber. It tends to separate easily. As it's a paper-based material that contains moisture, it's easily affected by temperature and humidity, so the quality gradually degrades when stored in general environments. This product uses innovative materials to overcome the problems with conventional carrier tape and becomes indispensable for packaging chip type passive components. It has a wide-range of applications in the semiconductor industry, This tape can be reused and does not produce toxic gases. Environmental friendliness, excellent stability, low cost and good performance-this is a product that has it all.

Blind Component

### Illustration of Main Products

Uni-Soleil manufactures and supplies window coverings, blind component parts and equipment. Blind and shade systems include Vertical, Venetian, Roller, Panel Track, Roman and Wood Venetians. Blinds systems that include a wide range of individual components, manufactured from plastics, metals, fabrics and natural materials. Uni-Soleil has a global customer base, with more than two hundred customers across fifty nations.

This global customer base helps to reduce the risk of any localised economic downturns.

In the past fifteen years, Uni-Soleil has insisted on being\_ Made in Taiwan\_, to nurture and maintain the traditional industries upon our soil, a policy that has been rewarded by continuous year on year growth.

In 2006 on target earnings are expected to exceed 6 billion Taiwan dollars.

Uni-Soleil plans further expansion by targeting the custom made blind and shade market.

By offering unique designs and assisting customers in creating blinds in various sizes. The quality of individual component parts has to meet our high standards, with parts utilizing a wide range of materials, materials such as aluminum, paper, steel, woven fabric, plastic, and wood.

The blind industry is considered by many as being a traditional industry, however the knowledge and specialist skills needed helps to deter new competitors in the market.

However, the recent increase in competition from low labour cost manufacturing countries has not deterred Uni-Soleil from committing to long term investment in further product research and development.

Uni-Soleil Enterprise Co., Ltd.

Sensor, Waste & Pedal Bins · Laundry Bins · Push Can · Neoprene Collection · Juicer & Ice Crusher · Corkscrew · Wine & Bar Accessories

### Illustration of Main Products

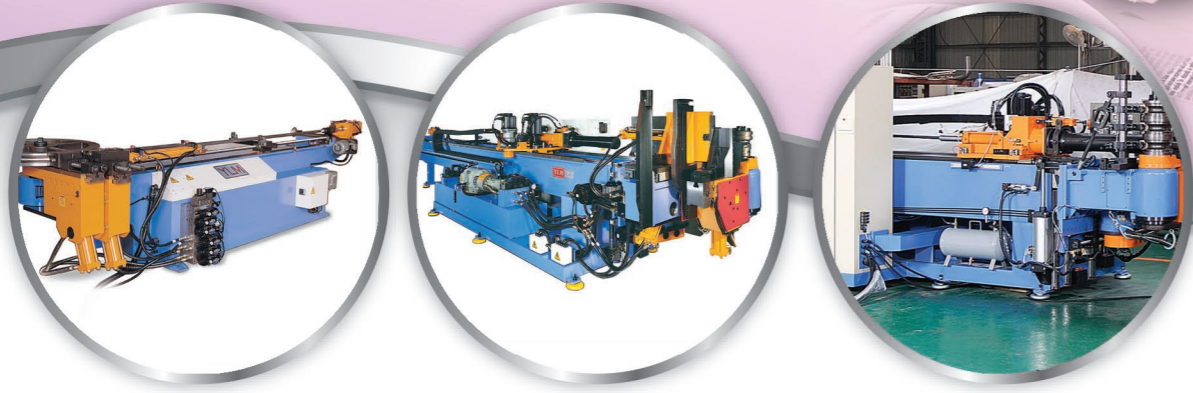

The iSmart™ waste bin incorporates a body static sensor technology, opening instantly when you approach and closing automatically 5- seconds.

Build-in patented, invisible, and harmless body static iSmart-Chip. 100% hands free operation without using an awkward pedal. Super quiet design, manual/automatic dual design. It can be freely switched, very convenient. Inside with its patent designed fix ring, the waste bin will hold the edges of your bag tightly to prevent it from failing. It also creates a germ free, odor free, automated environment.

Dr.Foot Assessment of Foot-Scan System

Our company developed the first set of “foot-scan” computer software, by clinical physical therapist and pedorthics to the foot of assessment and evaluation. The design is made very easy to use for medical personnel, has already obtained the national invention patents in U.S.A., China and Taiwan.

The system combines scanning, imaging technology and the knowledge foot medicine; the record from variety of devices and get performance data to explain the foot of health status; To meet the different industries and according to the measurement function of professional and precision, we especially planning and design of the two systems of foot-scan.

Ortho-Tech

Dedicated system for medical institutions, , this pathway also features added 『Measurement & photo of foot and gait of static/dynamic』, 『Prescription and design of insole & shoes』, 『Customer narration and history record』, and more added the 『Customer management system』, 『Account management system』, 『Referral unit management system』, 『Products management system』, 『Report system』 which applications such as sub-items to increase quality and quantity of services.

Fit-Tech

For the general store channel of the health shoes or sporting goods,. It functions more easy to detect with foot pressure and foot size to recommend the suitable of shoe size.

## Business Items

The slip-proof process technology on the ground / Family DIY Set / 10 Liter Barred for Technology

## Illustration of Main Products

After a number of concoctions and tests on the non-slip liquid with a non-slip technique, this non-slip liquid can be applied to various stone materials (granite, marble, terrazzo, and concrete), tiles (crystal tiles), etc. After construction, thousands of microholes are made on the floor. Taking advantage of the vacuum suction principle, an excellent non-slip effect is achieved, while the original feature of the floor is maintained. In particular, the effect is more remarkable when the floor is wet. The coefficient of friction meets the ASTM non-slip safety standard. The non-slip effect remains the same even when you clean the floor with hot water and strong acid, alkaline or take a shower.
