| Excellence in Higher Education

Taiwan is 1 of 4 “super innovators” along with Germany, Switzerland and the USA according to the 2019 WEF’s “Global Competitiveness Report.”

Taiwan’s universities have been steadily climbing global rankings in recent years, establishing Taiwan as one of Asia’s leading hubs for higher education.

11 universities in the top 100 Asian universities
(2021 QS Asia University Rankings)

12 universities in the world’s top 500 universities
(2021 QS World University Rankings)

2 universities in the world’s top 50 universities under 50 years old ranking
(2021 QS Top 50 under 50)

11 universities in the top 200 Asian universities
(2020 THE Asia University Rankings)

Utkarsh Kathuria (India )

National Taiwan University

Program: Electronic Design Automation

The main reason why I decided to study in Taiwan was that my Professor in Master’s always used to talk highly about the well-equipped labs in the universities and leading electronics companies in Taiwan. Besides that, it is a well-known fact that Taiwan is an electronic hub. It is being emerged as the biggest hub in the computer (portable) globally. The sincerity of people, their love for their work and country, friendliness and accommodating nature for foreigners and above all utilizing their time judiciously has made it as the first choice for study.

Why TAIWAN?

Friendly, safe, modern, convenient, and dynamic are words commonly used to describe Taiwan.

Its outstanding higher education system provides opportunities for international students to study a variety of courses and programs, ranging from Chinese language and history to tropical agriculture and forestry, engineering, social science, business, and more. In Taiwan, ancient Chinese culture is uniquely interwoven in the fabric of modern society. With its friendly vibes and first-class language courses, Taiwan is also an ideal place for learning traditional Chinese characters, which allows you to better connect with classic Chinese literature and culture.

Taiwan, the heart of Asia, provides exciting chances to experience quality higher education and connect with the Asian job market.

Rachelle Anne D. Arcega (Philippines 🇵🇭)

National Cheng Kung University

Program: Food Safety/Hygiene and Risk Management

I wanted to put myself in a competitive environment and wanted to seek more opportunities beyond my limited horizon. I decided to come to Taiwan because I saw how the Taiwanese government and universities value research, a field that is so often overlooked in my country. To top that, Taiwan is a very beautiful country with a rich culture and kind people. These, along with my eagerness to pursue things out of my comfort zone and a desire for continuous learning, have motivated me to study in Taiwan.

Study in Taiwan

Taiwan's Education System

In Taiwan, students can pursue higher education at 2-year and 4-year colleges and universities. University and college undergraduate programs usually require 4 years of study; graduate programs leading to a master degree require 1 to 4 years, and doctoral programs require 2 to 7 years.

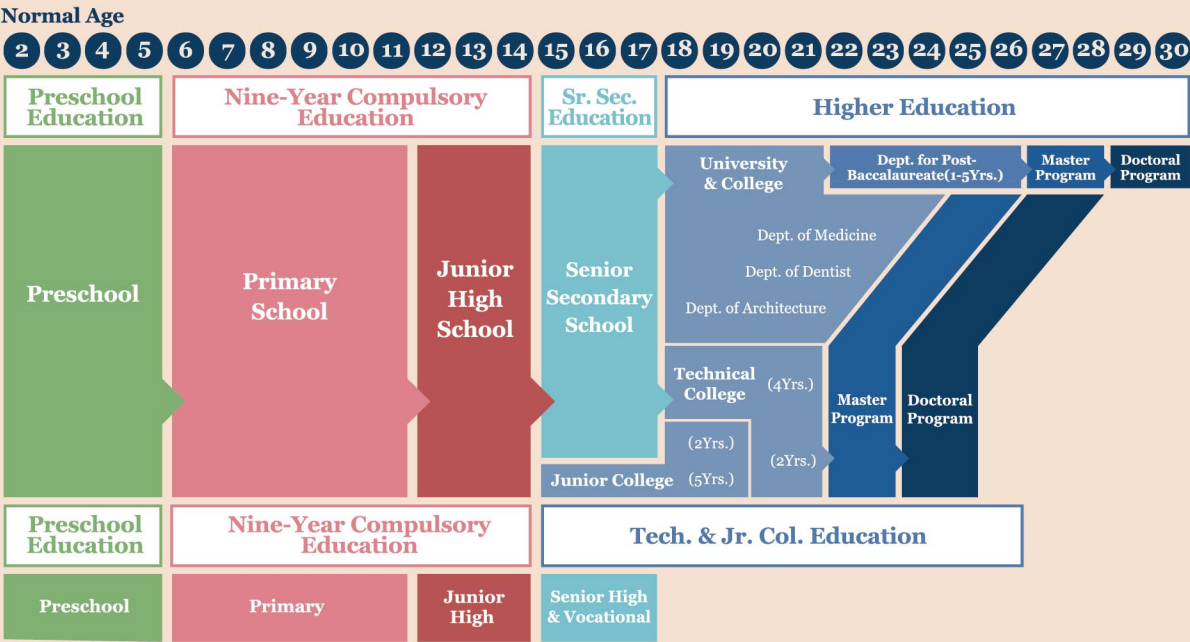

In most institutions of higher education, the academic year begins in August or September and ends in July the following year. The academic year has two semesters: the first semester is from August usually to the following January, and the second semester begins in February and ends in July.

If you need more information about the education system of Taiwan, please visit the website of the Ministry of Education.

Nguyen Tuan Duong (Vietnam 🇻🇳)

Ming Chi University of Technology

Program: International Management Business Administration

Taiwan over the past four decades has demonstrated incredible economic growth and global integration to become a high-tech industrialized economy with many great companies in the world. I've always been fascinated by how international trade has been playing a key role in Taiwan, securing the country's economic expansions. In addition, Taiwan's cultures, traditions, and people had deeply impressed me ever since I was young. Friendly and hard-working citizens, the intelligence and great patience in the developing routine of the high-tech industry, interesting movies, music, and breathtaking tourist attractions, these all made me want to experience life in Taiwan.
